or

(b) Direct (Build-Up) Method: based on the value of originating materials

$$\text{QVC} = \frac{\text{VOM} + \text{Direct Labour Cost} + \text{Direct Overhead Cost} + \text{Profit} + \text{Other Costs}}{\text{ExWorks or FOB Value}} \times 100$$

QVC is the qualifying value content of a good, expressed as a percentage.

2. For the purposes of the product specific rules of origin, the following definitions apply:

Value of Non-Originating Materials (VNM) is the customs value of the non- originating materials at the time of importation, inclusive cost of insurance and freight up to the port of importation, or the earliest ascertained price paid or payable in the Party where the production takes place for all non-originating materials, parts or produce that are acquired by the producer in the production of the good. Ex-Works Price means the price paid for the good ex-works to the manufacturer in the Party in who's undertaking the last working or processing is carried out, provided the price includes the value of all the materials used, minus any internal taxes which are, or may be, repaid when the good obtained is exported;

Direct Overhead Cost is the total overhead expense; and

Other Costs are the costs incurred in placing the good in the ship or other means of transport for export including, but not limited to, domestic transport costs, storage and warehousing, port handling, brokerage fees and service charges. This cost is only applicable when calculating QVC on FOB basis.

3. Each Party shall provide that all costs considered for the calculation of QVC are recorded and maintained in conformity with the Generally Accepted Accounting Principles applicable in the territory of a Party where the good is produced.

Article 3.5. Accumulation

1. An originating good or material of one Party shall be considered originating in the territory of the other Party when used in the production of a good in the territory of the other Party.

Article 3.6. De Minimis

1. A good that does not satisfy the requirements pursuant to Annex 3A (Product Specific Rules Schedule) shall nonetheless be treated as an originating good if:

(a) for a good classified in Chapters 01-49 and 64-97 of the HS Code, the value of non-originating materials that have been used in the production of the good and did not undergo the applicable change in tariff classification does not exceed 10 per cent of the FOB or 15 per cent of the Ex-Works value of the good. The value of those non-originating materials shall be determined pursuant to paragraph 1 of Article 3.4 (Qualifying Value Content); or

(b) for a good classified in Chapters 50 through 63 of the HS Code, the weight of all non-originating materials used in its production that did not undergo the required change in tariff classification does not exceed 10 per cent of the total weight of the good or the value of those materials does not exceed 10 per cent of the FOB or 15 per cent of the Ex-Works value of the good;

and the good meets all other applicable criteria of this Chapter.

2. Notwithstanding paragraph 1, the value of such non-originating materials shall, however, be included in the value of non-originating materials for any applicable QVC requirement for the good.

Article 3.7. Insufficient Working or Processing

1. Where a claim for origin is based solely on QVC, a good shall not be considered to be originating in the territory of a Party if the following operations are undertaken exclusively by itself or in combination in the territory of that Party:

(a) operations to ensure the preservation of products in good condition during transport and storage such as drying, freezing, ventilation, chilling and like operations;

Article 3.8. Indirect Materials

An indirect material shall be treated as an originating material without regard to where it is produced and its value shall be the cost registered in accordance with the Generally Accepted Accounting Principles in the records of the producer of the good.

Article 3.9. Accessories, Spare Parts, Tools

1. Accessories, spare parts, tools, and instructional or other information materials delivered with a good that form part of

the good's standard accessories, spare parts, tools, and instructional or other information materials shall be regarded as a part of the good, and shall be disregarded in determining whether or not all the non-originating materials used in the production of the originating goods undergo the applicable change in tariff classification provided that:

(a) the accessories, spare parts, tools, and instructional or other information materials are classified with and not invoiced separately from the good; and

(b) the quantities and value of the accessories, spare parts, tools, and instructional or other information materials presented with the good are customary for the good.

2. Notwithstanding paragraph 1, for goods that are subject to QVC requirement, the value of the accessories, spare parts, tools and instructional or other information materials shall be taken into account as originating or non-originating materials, as the case may be, in calculating the QVC of the goods.

Article 3.10. Packaging Materials and Containers for Retail Sale

1. Each Party shall provide that packaging materials and containers in which a good is packaged for retail sale, if classified with the good, according to Rule 5 of the General Rules for the Interpretation of the Harmonized System, shall be disregarded in determining whether all the non-originating materials used in the production of the good undergo the applicable process or change in tariff classification requirement set out in Annex 3A (Product Specific Rules Schedule) or whether the good is wholly obtained or produced.

2. If the good is subject to QVC requirement, the value of such packaging materials and containers shall be taken into account as originating or non-originating materials, as the case may be, in calculating the QVC of the good.

Article 3.11. Unit of Qualification

The unit of qualification for the application of the provisions of this Chapter shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonized System. Accordingly, it follows that:

(a) when a product composed of a group or assembly of articles is classified under a single heading, the whole constitutes the unit of qualification;

(b) when a consignment consists of a number of identical products classified under the same heading, each product shall be taken individually into account when in determining whether it qualifies as an originating good.

Article 3.12. Packaging Materials and Containers for Transportation and Shipment

Each Party shall provide that packing materials and containers for transportation and shipment are disregarded in determining whether a good is originating.

Article 3.13. Fungible Goods and Materials

Article 3.14. Article 3.14 Sets of Goods

Sets, as defined in General Rule 3 of the Harmonized System, shall be regarded as originating when all component goods are originating. However, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of non-originating products does not exceed 20% of the FOB value of the set.

Article 3.15. Intermediate Goods

1. If a good which has obtained originating status in a Party in accordance with Article 3.2 (Originating Goods) is used as a material in the manufacture of another good, no account shall be taken of the non-originating materials which may have been used in its manufacture.
2. If a non-originating material is used in the production of a good, the following may be counted as originating content in determining whether the resulting good meets a QVC requirement:
 - (a) the value of production of the non-originating material undertaken in the territory of one or both Parties by one or more producers; and
 - (b) the value of any originating material used in the production of the non- originating material undertaken in the territory of one or both Parties by one or more producers.
3. The customs authority of the importing Party may request that the importer provide evidence of compliance with the requirements set out in paragraph 2.

Article 3.16. Value of Materials Used In Production

For the purposes of this Chapter, the value of a material is:

- (a) for a material imported by the producer of the good, the price actually paid or payable for the material at the time of importation or other value determined in accordance with the Customs Valuation Agreement, including the costs incurred in the international shipment of the material;
- (b) for a material acquired in the territory where the good is produced:
 - (i) the price paid or payable by the producer in the Party where the producer is located;

 - (ii) an amount equivalent to the profit added in the normal course of trade, or equal to the profit that is usually reflected in the sale of goods of the same class or kind as the self-produced material that is being valued.

Article 3.17. Further Adjustments to the Value of Materials

1. For an originating material, the following expenses may be added to the value of the material, if not included under Article 3.16 (Value of Materials Used in Production):
 - (a) the costs of freight, insurance, packing, and all other costs incurred to transport the material to the location of the producer of the good;
 - (b) duties, taxes, and customs brokerage fees on the material, paid in the territory of a Party, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, which include credit against duty or tax paid or payable; and
 - (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of reusable scrap or by-product.
2. For a non-originating material or material of undetermined origin, the following expenses may be deducted from the value of the material:
 - (a) the costs of freight, insurance, packing, and all other costs incurred in transporting the material to the location of the producer of the good;
 - (b) duties, taxes, and customs brokerage fees on the material paid in the territory of one or both Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, which include credit against duty or tax paid or payable; and
 - (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of

reusable scrap or by-product.

3. For greater certainty, when a non-originating material is used in the production of a good, the values referred to in paragraphs 2(a) through 2(b) of Article 3.15 (Intermediate Goods) may be:

(a) deducted from the value of the non-originating material if calculating the QVC requirement using the Indirect Method; or

(b) included in the value of originating materials if calculating the QVC requirement using the Direct Method.

4. For the purposes of this Article, if a cost, expense, or value is unknown or documentary evidence of the amount of the adjustment is not available, then no adjustment is allowed for that cost, expense, or value.

Section B. Origin Procedures

Article 3.18. Transit and Transshipment

1. An originating good shall retain its originating status if the good has been transported to the importing Party without passing through the territory of a non-party.

2. An originating good transported through the territory of one or more non-parties or stored in a temporary warehouse there shall retain its originating status provided that the good:

(a) does not undergo further production or any other operation outside the territories of the Parties, other than unloading, reloading, separation from a bulk shipment or splitting of a consignment, storing, repacking, labelling or marking required by the importing Party or any other operation necessary to preserve it in good condition or to transport the good to the territory of the importing Party; and

(b) is not released to free circulation in the territory of any non-party.

3. "Free circulation" means that the good has cleared customs, applicable duties have been paid, and the good is available for use in a domestic market. The customs authority of the importing Party may request that the importer provides evidence of compliance with the requirements set out in paragraph 2. This evidence may include, but is not limited to, the following:

(a) certificate (known as a certificate of non-manipulation) issued by the customs authorities of the country of transit:

(i) giving an exact description of the goods;

Article 3.19. Free Economic Zones or Free Zones

Article 3.20. Third Party Invoicing

1. The customs authority in the importing Party shall not deny a claim for preferential tariff treatment only for the reason that the invoice was not issued by the exporter or producer of a good provided that the good meets the requirements in this Chapter.

2. The exporter of the goods shall indicate "third party invoicing" and such information as name and country of the company

issuing the invoice shall appear in in the appropriate field as detailed in Annex 3B (Certificate of Origin Minimum Information Requirements) or, in the case of an Origin Declaration made out by an approved exporter as per Article 3.24 (Origin Declaration), on the Origin Declaration.

Article 3.21. Proof of Origin

1. Each Party shall provide that an importer may make a claim for preferential tariff treatment under this Agreement on importation into the other Party, on the basis of a Proof of Origin.
2. Either of the following shall be considered as a Proof of Origin:
 - (a) a Certificate of Origin issued by competent authority as per Article 3.22 (Certificate of Origin); or
 - (b) an Origin Declaration implemented in accordance with Article 3.24 (Origin Declaration).

Article 3.22. Certificate of Origin

3. A Certificate of Origin shall bear an official seal of the competent authority. The official seal may be applied electronically.
4. Each Party shall provide that a Certificate of Origin shall be completed in the English language and shall remain valid for one year from the date on which it is issued.
5. If an official seal is applied electronically, an authentication mechanism, such as authorised QR code linking to a secured website, may be included in the certificate to assist in verification purposes.

Article 3.23. Electronic Data Origin Exchange System

The Parties shall endeavour to develop an electronic system for origin information exchange to ensure the effective and efficient implementation of this Chapter particularly on transmission or verification of certificate of origin.

Article 3.24. Origin Declaration

1. The Parties shall commence a review of this Article on completion of two years from the date of entry into force of this Agreement to consider the introduction of an Origin Declaration by an exporter, producer or importer as a Proof of Origin. If the review results in the Parties agreeing on introducing an Origin Declaration, the provisions for such implementation shall be agreed and adopted by the Joint Committee and implemented by the Parties.
2. For the purposes of paragraph 2(b) of Article 3.21 (Proof of Origin), the Parties shall recognise an Origin Declaration made by an approved exporter.
3. The customs or competent authorities of the exporting Party may authorise any exporter ("approved exporter") who exports goods under this Agreement, to make out Origin Declarations, irrespective of the value of the goods concerned.
4. The customs or competent authorities of the exporting Party may grant the status of approved exporter, subject to any conditions which they consider appropriate.
5. The customs or competent authorities of the exporting Party shall share or publish the list of approved exporters and periodically update it.
6. An exporter seeking such authorisation must offer to the satisfaction of the customs or competent authorities of the exporting party all guarantees necessary to verify the originating status of the goods as well as the fulfilment of the other requirements of this Chapter.

7. An Origin Declaration (the minimum information requirements of which appears in Annex 3C (Origin Declaration Minimum Information Requirements)) shall be made out by the approved exporter by typing, stamping or printing the declaration on the invoice, the delivery note or another commercial document which describes the products concerned in sufficient detail to enable them to be identified.

8. The declaration may also be hand-written; if the declaration is hand-written, it shall be written in permanent ink in legible printed English characters.

9. The approved exporter making out an Origin Declaration shall be prepared to submit at any time, at the request of the customs or competent authorities of the exporting Party, all appropriate documents proving the originating status of the goods concerned, as well as the fulfilment of the other requirements of this Chapter.

Article 3.25. Waiver of a Certificate of Origin or Origin Declaration

1. For the purpose of granting preferential tariff treatment under this Chapter, a Party may waive the requirements for the presentation of a Certificate of Origin or Origin Declaration and grant preferential tariff treatment to:

(a) any consignment of originating goods of a customs value not exceeding 1,000 AUD for Australia or 2,000 AED for the United Arab Emirates, or such higher amount as each Party may establish; or

(b) other originating goods as provided under its laws, regulations or administrative arrangements.

2. Waivers provided for in paragraph 1 shall not be applicable when it is established by the customs administration of the importing Party that the importation forms part of a series of importations that may reasonably be considered to have been undertaken or arranged for the purpose of avoiding the submission of a Certificate of Origin or Origin Declaration.

Article 3.26. Application for a Certificate of Origin

1. Certificates of Origin shall be issued by the competent authority of the exporting Party, either upon an electronic application or an application in paper form, having been made by the exporter or under the exporter's responsibility by his or her authorised representative in accordance with the domestic regulations or administrative requirements of the exporting Party.

(c) HS Code, description, gross weight or other quantity and value conform to the good to be exported.

Article 3.27. Certificate of Origin Issued Retrospectively

1. The Certificate of Origin shall be issued by the competent authority of the exporting Party prior to or at the time of shipment.

2. In exceptional cases where a Certificate of Origin has not been issued prior to or at the time of shipment, due to involuntary errors or omissions or other valid causes, as determined by the competent authority of the exporting party the Certificate of Origin may be issued retroactively but with a validity no longer than one year from the date of shipment, in which case it is necessary to indicate "Issued Retroactively" in the appropriate field as detailed in Annex 3B (Certificate of Origin Minimum Information Requirements).

3. The provisions of this Article shall be applied to goods which comply with the provisions of this Agreement, and which on the date of its entry into force, are either in transit or are in the territory of the Parties in temporary storage under customs control. This shall be subject to the submission to the customs authorities of the importing Party, within six months from the said date, of a Certificate of Origin issued retrospectively by the competent authority of the exporting Party together with documents, showing that the goods have been transported in accordance with the provisions of Article 3.18 (Transit and Transshipment).

Article 3.28. Loss of the Certificate of Origin

1. The certified true copy of the original Certificate of Origin shall be endorsed with an authorised signature and seal and bear the words "CERTIFIED TRUE COPY" and the date of issuance of the original Certificate of Origin. The validity of the replacement certificate will be the same as the original.

Article 3.30. Treatment of Minor Discrepancies

A Party shall not reject a certificate of origin due to minor errors or discrepancies, such as slight discrepancies between documents, omissions of information or typing errors, provided these minor discrepancies or errors do not create doubt as to the originating status of the good.

Article 3.31. Denial of Preferential Tariff Treatment

1. Except as otherwise provided in this Chapter, the customs authority of the importing Party may deny a claim for preferential tariff treatment or recover unpaid duties, in accordance with its laws and regulations, where:
 - (a) the good does not meet the requirements of this Chapter; or
 - (b) the importer of the good failed to comply with any of the relevant requirements of this Chapter for obtaining preferential tariff treatment; or
 - (c) the customs or competent authority of the importing Party has not received sufficient information to determine that the good is originating; or
 - (d) the competent or customs authority of the exporting Party, exporter or producer does not comply with the requirements of verification in accordance with Article 3.32 (Verification) or Article 3.33 (Verification Visits).
2. If the customs authority of the importing Party denies a claim for preferential tariff treatment, it shall provide the decision in writing to the importer that includes the reasons for the decision.
3. Upon being communicated the grounds for denial of preferential tariff treatment, the importer may, within the period provided for in the custom laws of the importing Party, file an appeal against such decision with the appropriate authority under the customs laws and regulations of the importing Party.
4. The customs authority of a Party may not deny a claim of preferential tariff treatment based solely on the certificate of origin being submitted in electronic format.

Article 3.32. Verification

1. The customs authority of the importing Party may conduct a verification check when it has reasonable doubt as to the authenticity of the document or as to the accuracy of the information regarding the true origin of the goods in question or of certain parts thereof.
2. For the purpose of paragraph 1, the custom authority of the importing Party may conduct the checking process by issuing a written request for additional information from the contact point of the exporting Party.
3. The request shall be accompanied with the copy of Proof of Origin concerned and shall specify the reasons and any additional information suggesting that the particulars given on the said Proof of Origin may be inaccurate.
4. The customs authority of the importing Party may suspend the provisions on preferential treatment while awaiting the result of verification. However, it may release the goods to the importer subject to any administrative measures deemed

necessary, provided that they are not held to be subject to import prohibition or restriction and there is no suspicion of fraud.

5. Pursuant to paragraph 2, the concerned Party receiving a request for verification check shall respond to the request promptly and reply not later than 90 days after the receipt of the request.

6. When a reply from the concerned Party is not obtained within 90 days after the receipt of the request pursuant to paragraph 5, the customs authority of the importing Party may deny preferential tariff treatment to the good referred to in the said Proof of Origin that would have been subject to the verification check and recover unpaid duties.

Article 3.33. Verification Visits

1. Pursuant to paragraph 2 of Article 3.32 (Verification), if the customs or the competent authority of the importing Party is not satisfied with the outcome of the retroactive check, it may, under exceptional circumstances for justifiable reasons, conduct a verification visit to the producer or exporter premises including inspection of the exporter's or producer's accounts, records or any other check, related to the good under investigation considered appropriate.

2. Prior to conducting a verification visit pursuant to paragraph 1, the customs or the competent authority of the importing Party shall deliver a written notification to the contact point of the exporting Party of the planned verification visit.

3. The written notification mentioned in paragraph 2 shall be as comprehensive as possible and shall include, among others:

4. The contact point of the exporting Party shall obtain the written consent of the producer or exporter whose premises are to be visited;

5. Officials of the customs or competent authority of the exporting Party may participate in the verification visit as observers.

6. When a written consent from the producer or exporter is not obtained within 30 days from the date of receipt of the verification visit notification, the customs authority of the importing Party may deny preferential tariff treatment to the good referred to in the said Certificate of Origin that would have been subject to the verification visit.

7. The competent or customs authority of the importing Party conducting the verification visit shall provide the producer or exporter, whose good is subject to such verification with a written determination of whether or not the good subject to such verification qualifies as an originating good.

8. Upon the issuance of the written determination referred to in paragraph 7 that the good qualifies as an originating good, the customs authority of the importing party shall immediately restore preferential tariff treatment and promptly refund the duties paid in excess of the preferential duty or release guarantees obtained in accordance with the laws and regulations of the Parties.

9. Upon the issuance of the written determination referred to in paragraph 6 that the good does not qualify as an originating good, the producer or exporter shall be allowed 30 days from the date of receipt of the written determination to provide in writing comments or additional information regarding the eligibility of the good for preferential tariff treatment. The final written determination shall be communicated to the producer or exporter within 30 days from the date of receipt of the comments or additional information.

10. Except in the case force majeure, the verification visit process, including the actual visit and the determination under paragraph 7, shall be carried out and its results communicated to the competent or customs authority of the exporting Party within a maximum period of six months from the first day the initial verification visit was requested. While the process of verification is being undertaken, paragraph 4 of Article 3.32 (Verification) shall be applied.

Article 3.34. Record Keeping Requirement

1. For the purposes of the verification process pursuant to Article 3.32 (Verification) and Article 3.33 (Verification Visits), each

Party shall require that:

- (a) the exporter, importer, producer or their authorised representative making the Declaration that the goods are originating goods retain, for a period not less than five years from the date of issuance of the Proof of Origin, or a longer period in accordance with its domestic laws and regulations, all supporting records necessary to prove that the good for which the Proof of Origin was issued was originating; and
 - (b) the importers shall retain, for a period not less than five years from the date of importation of the good, or a longer period in accordance with its domestic laws and regulations, all records to prove that the good for which preferential tariff treatment was claimed was originating; and

Article 4.8. Penalties

1. Each Party shall maintain measures that allow for the imposition of criminal, civil or administrative penalties, whether solely or in combination, for violations of the Party's customs laws, regulations or procedural requirements.

2. Each Party shall ensure that penalties issued for a breach of a customs law, regulations or procedural requirements are imposed only on the persons responsible for the breach under its laws.

No portion of the remuneration of a government official shall be calculated as a fixed portion or percentage of any penalties or duties assessed or collected.

(d) if a Party does not promptly release goods it shall inform (3) the importer, to the extent practical and permitted by its law, regulations, or law enforcement measures, the reasons why the goods are not released or which border agency, if not the Customs Administration, has withheld release of the goods.

3. Nothing in this Article requires a Party to release a good if its requirements for release have not been met nor prevents a Party from enforcing or liquidating a guarantee in the form of surety, a deposit, or other appropriate instrument provided for in its laws and regulations.

4. Each Party may allow, to the extent practicable and in accordance with its customs laws, goods intended for import to be moved within its territory under customs control from the point of entry into the Party's territory to another customs office in its territory from where the goods are intended to be released, provided the applicable regulatory requirements are met.

(1) For the purposes of this Article, release of goods means the action by a Party to permit goods undergoing clearance to be placed at the disposal of the trader.

(2) For greater certainty, the rapid release of goods is to be provided within a period no greater than that required to ensure compliance with its customs laws.

Each Party may require that any storage facilities arranged by the importer have been approved or designated by its relevant authorities. The movement of the goods to those storage facilities, including authorisations for the operator moving the goods, may be subject to the approval, if required, of the relevant authorities. Each Party shall, where practicable and consistent with its legislation, upon the request of the importer, provide for any procedures necessary for release to take place at those storage facilities.

2. Each Party shall publish its AEO programme requirements, including criteria for qualification, in accordance with Article 4.4 (Publication and Availability of Information).

3. The criteria for qualification as an AEO shall not be designed or applied so as to afford or create arbitrary or unjustifiable discrimination between operators where the same conditions prevail and shall allow the participation of SMEs.

(f) provide that, under normal circumstances, no customs duties will be assessed on express shipments valued at or below a fixed amount set under the Party's law. (6)

(4) In cases where a Party has an existing procedure that provides the treatment in Article 4.13, this provision does not require that Party to introduce separate expedited release procedures.

(5) Additional documents may be required as a condition for release.

(6) Notwithstanding this Article, a Party may assess customs duties, or may require formal entry documents, for restricted or controlled goods, such as goods subject to import licensing or similar requirements.

Article 4.14. Review and Appeal

1. Each Party shall ensure that any person to whom it issues a determination on a customs matter has access to:

3. The final determination of equivalence rests with the importing Party.
4. The fact that a good of the exporting Party complies with SPS measures or standards that have been accepted as equivalent to SPS measures and standards of the importing Party shall not remove the need for that product to comply with any other relevant, mandatory requirements of the importing Party.

5. Each Party shall notify the other Party of final sanitary or phytosanitary measures through the WTO SPS notification submission system. shall make commitments under the applicable paragraphs in Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access) and Article 9.7 (Local Presence). Article 9.4. National Treatment

1. A Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitments) shall, in the sectors inscribed in its Schedule in Annex 9D (Schedules of Specific Commitments) and subject to any conditions and qualifications set out therein, accord to services and service suppliers of the other Party, in respect of all measures affecting the supply of services, treatment no less favourable than it accords to its own like services and service suppliers. (3)

2. A Party making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures and Reservations) shall accord to services and service suppliers of the other Party, in respect of all measures affecting the supply of services, treatment no less favourable than that it accords to its own like services and service suppliers, subject to its non-conforming measures and reservations as provided in Article 9.9 (Schedules of Non-Conforming Measures and Reservations). (4)

3. A Party may meet the requirement under paragraph 1 or 2 by according to services and service suppliers of the other Party, either formally identical treatment or formally different treatment to that it accords to its own like services and service suppliers.

4. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Party compared to like services or service suppliers of the other Party.

(3) Specific commitments assumed under this Article shall not be construed to require any Party to compensate for any inherent competitive disadvantages which result from the foreign character of the relevant services or service suppliers.

(4) Nothing in this Article shall be construed to require any Party to compensate for any inherent competitive disadvantages which result from the foreign character of the relevant services or service suppliers.

Article 9.5. Most-Favoured-Nation Treatment

1. A Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitments) shall, in respect of the sectors and subsectors set out in the Most-Favoured-Nation Treatment Sectoral Coverage Appendix to its Schedule in Annex 9D (Schedules of Specific Commitments) and subject to any conditions and qualifications set out therein, accord to services and service suppliers of the other Party treatment no less favourable than that it accords to like services and service suppliers of a non-party.

2. A Party making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures and Reservations) shall, subject to its non-conforming measures and reservations set out in its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations), accord to services and service suppliers of the other Party treatment no less favourable than that it accords to like services and service suppliers of a non-party.

3. Notwithstanding paragraphs 1 and 2, each Party reserves the right to adopt or maintain any measure that accords differential treatment to services and service suppliers of any non-party under any bilateral or multilateral international agreement in force at, or signed prior to, the date of entry into force of this Agreement.

4. For sectors and subsectors either not set out in a Party's Most-Favoured-Nation Treatment Sectoral Coverage Appendix to its Schedule in Annex 9D (Schedules of Specific Commitments) pursuant to paragraph 1, or subject to a Party's non-conforming measures and reservations set out in its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations) pursuant to paragraph 2, if, after the date of entry into force of this Agreement, a Party subsequently enters into any agreement with a non-party in which it provides treatment to services or service suppliers of that non-party more favourable than it accords to like services or service suppliers of the other Party, the other Party may request consultations to discuss the possibility of extending, under this Agreement, treatment no less favourable than that provided under the agreement with the non-party. In such circumstances, the Parties shall enter into consultations bearing in mind the overall balance of benefits.

Article 9.6. Market Access

1. With respect to market access through the modes of supply identified in subparagraph (y) of Article 9.1 (Definitions), a Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitments) shall accord services and service suppliers of the other Party treatment no less favourable than that provided for under the terms, limitations, and conditions agreed and specified in its Schedule in Annex 9D (Schedules of Specific Commitments). (5)

2. The measures which a Party shall not adopt or maintain either on the basis of a regional subdivision or on the basis of its entire territory, either in sectors where market access commitments are undertaken and in accordance with its specific commitments, as provided in Article 9.8 (Schedules of Specific Commitments), or subject to its non-conforming measures and reservations, as provided in Article 9.9 (Schedules of Non-Conforming Measures and Reservations), are defined as:

(b) limitations on the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test;

(c) limitations on the total number of service operations or on the total quantity of service output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test; (6)

(d) limitations on the total number of natural persons that may be employed in a particular service sector or that a service supplier may employ and who are necessary for, and directly related to, the supply of a specific service in the form of numerical quotas or the requirement of an economic needs test;

(e) measures which restrict or require specific types of legal entity or joint venture through which a service supplier may supply a service; and

(f) limitations on the participation of foreign capital in terms of maximum percentage limit on foreign shareholding or the total value of individual or aggregate foreign investment.

(5) If a Party undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in subparagraph (y)(i) of Article 9.1 (Definitions) and if the cross-border movement of capital is an essential part of the service itself, that Party is thereby committed to allow such movement of capital. If a Party undertakes a market-access commitment in relation to the supply of a service through the mode of supply referred to in subparagraph (y)(iii) of Article 9.1 (Definitions), it is thereby committed to allow related transfers of capital into its territory.

(6) Subparagraph 2(c) does not cover measures of a Party which limit inputs for the supply of services.

Article 9.7. Local Presence

A Party making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures) shall not require a service supplier of the other Party to establish or maintain a representative office, a branch, or any form of juridical person, or to be resident, in its territory as a condition for the supply of a service as described in subparagraphs (y)(i), (ii), or (iv) of Article 9.1 (Definitions), subject to its non-conforming measures as provided in Article 9.9 (Schedules of Non-Conforming Measures).

Article 9.8. Schedules of Specific Commitments

1. A Party making commitments in accordance with this Article shall set out in its Schedule in Annex 9D (Schedules of Specific Commitments), the specific commitments it undertakes under Article 9.4 (National Treatment), Article 9.6 (Market Access), and Article 9.10 (Additional Commitments). With respect to sectors where such commitments are undertaken, each Schedule in Annex 9D (Schedules of Specific Commitments) shall specify:

(a) terms, limitations, and conditions on market access;

(b) conditions and qualifications on national treatment;

(c) undertakings relating to additional commitments; and

(d) where appropriate, the timeframe for implementation of such commitments.

2. Measures inconsistent with both Article 9.4 (National Treatment) and Article 9.6 (Market Access) shall be inscribed in the column relating to Article 9.6 (Market Access). In this case, the inscription shall be considered to provide a condition or qualification to Article 9.4 (National Treatment) as well.

Article 9.9. Schedules of Non-Conforming Measures and Reservations

1. For a Party making commitments in accordance with this Article, Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access), and Article 9.7 (Local Presence) shall not apply to:

(a) any existing non-conforming measure that is maintained by that Party at:

(i) the central level of government, as set out by that Party in Part A of its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations);

(ii) a regional level of government, as set out by that Party in Part A of its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations); or

(iii) a local level of government;

(b) the continuation or prompt renewal of any non-conforming measure referred to in subparagraph (a); and

(c) an amendment to any non-conforming measure referred to in subparagraph (a), to the extent that the amendment does not decrease the conformity of the measure, as it existed immediately before the amendment, with Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access) or Article 9.7 (Local Presence).

2. Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access), and Article 9.7 (Local Presence) shall not apply to any measure that a Party adopts or maintains with respect to sectors, sub-sectors, or activities set out in Part B of its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations).

Article 9.10. Additional Commitments

1. The Parties may negotiate commitments with respect to measures affecting trade in services, including those regarding qualifications, standards, or licensing matters, not subject to scheduling, under:

(a) Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), or Article 9.6 (Market Access), for a Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitment); or

(b) Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access), or Article 9.7 (Local Presence) for a Party making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures and Reservations).

2. A Party making additional commitments under subparagraph 1(a) shall inscribe such commitments in its Schedule in Annex 9D (Schedules of Specific Commitments).

3. A Party making additional commitments under subparagraph 1(b) shall inscribe such commitments in List C of its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations).

Article 9.11. Modification of Schedules

1. Except as provided in paragraph 2, a Party ("modifying Party") may modify or withdraw any commitment in its Schedule in Annex 9D (Schedules of Specific Commitments) at any time after three years from the date on which that commitment entered into force, provided that:

(a) it notifies the other Party ("affected Party") of its intention to modify or withdraw a commitment no later than three months before the intended date of implementation of the modification or withdrawal;

(b) upon notification of a Party's intent to make such modification or withdrawal, the Parties shall consult and attempt to reach agreement on the appropriate compensatory adjustment; and

(c) such an agreement between the Parties has been reached.

2. In achieving a compensatory adjustment, the Parties shall endeavour to maintain a general level of mutually advantageous commitment that is no less favourable to trade than provided for in the Schedules in Annex 9D (Schedules of Specific Commitments) prior to such negotiations.

3. If agreement under paragraph 1(c) is not reached between the modifying Party and the affected Party within three months, the modifying Party may refer the matter to a panel in accordance with the procedures set out in Chapter 25 (Dispute Settlement) or, where agreed between the Parties, to an alternative arbitration procedure. The modifying Party may modify or withdraw a commitment once it has made the compensatory adjustments in conformity with the findings of the panel.

4. If the modifying Party implements its proposed modification or withdrawal and does not comply with the findings of the panel, the affected Party may modify or withdraw substantially equivalent benefits in conformity with the findings of the panel.

Article 9.12. Transparency

1. The Parties recognise that transparent measures governing trade in services are important in facilitating the ability of service suppliers to gain access to, and operate in, each other's markets. Each Party shall promote regulatory transparency in trade in services.

2. For sectors and subsectors set out in a Party's Schedule in Annex 9D (Schedules of Specific Commitments), or subject to a Party's non-conforming measures and reservations set out in its Schedule in Annex 9E (Schedules of Non-Conforming Measures and Reservations), each Party shall ensure that all measures of general application affecting trade in services are administered in a reasonable, objective and impartial manner.

3. Each Party shall publish promptly, or otherwise make publicly available, and, except in emergency situations, at the latest by the time of their entry into force:

(a) all relevant measures of general application which pertain to or affect the operation of this Chapter; and

(b) all international agreements pertaining to or affecting trade in services to which the Party is a signatory.

4. To the extent practicable and in a manner consistent with its legal system for adopting measures, each Party shall publish in advance, or otherwise make publicly available in advance, any measures of general application affecting trade in services that it proposes to adopt which significantly affect trade in services covered by this Chapter.

5. Each Party shall respond promptly to any request by the other Party for specific information on:

(a) any measures referred to in paragraph 3(a) or international agreements referred to in paragraph 3(b); and

(b) any new, or any changes to existing, laws, regulations or administrative guidelines which significantly affect trade in services.

Article 9.13. Domestic Regulation

1. Subject to paragraph 2, this Article applies to measures of a Party relating to licensing requirements and procedures, qualification requirements and procedures, and technical standards affecting trade in services.

2. This Article does not apply to a sector or measure to the extent that such sector or measure is not subject to Article 9.4 (National Treatment) or Article 9.6 (Market Access) by reason of a Party's commitments made in accordance with either Article 9.8 (Schedules of Specific Commitments) or Article 9.9 (Schedules of Non-Conforming Measures and Reservations).

3. If a Party adopts or maintains measures relating to the authorisation for the supply of a service, the Party shall ensure that:

(a) such measures are based on objective and transparent criteria; (7)

(7) Such criteria may include, *inter alia*, competence and the ability to supply a service, including to do so in a manner consistent with a Party's regulatory requirements, such as health and environmental requirements. Competent authorities may assess the weight to be given to each criterion.

(b) the procedures are impartial, and that the procedures are adequate for applicants to demonstrate whether they meet the requirements, if such requirements exist;

(c) the procedures do not in themselves unjustifiably prevent the fulfilment of requirements; and

(d) such measures do not discriminate between men and women. (8)

(8) Differential treatment that is reasonable and objective, and aims to achieve a legitimate purpose, and adoption by a Party of temporary special measures aimed at accelerating de facto equality between men and women, shall not be considered discrimination for the purposes of this subparagraph.

4. If a Party requires authorisation for the supply of a service, the Party shall promptly publish, (9) or otherwise make publicly available in writing, the information necessary for service suppliers or persons seeking to supply a service to comply with the requirements and procedures for obtaining, maintaining, amending and renewing such authorisation. Such information shall include, inter alia, where it exists:

- (a) the requirements and procedures;
- (b) contact information of relevant competent authorities;
- (c) fees;
- (d) technical standards;
- (e) procedures for appeal or review of decisions concerning applications;
- (f) procedures for monitoring or enforcing compliance with the terms and conditions of licenses or qualifications;
- (g) opportunities for public involvement, such as through hearings or comments; and
- (h) indicative timeframes for processing of an application.

(9) For purposes of these disciplines, "publish" means to include in an official publication, such as an official journal, or on an official website. The Parties are encouraged to consolidate electronic publications into a single portal.

5. Each Party shall, to the extent practicable, avoid requiring an applicant to approach more than one competent authority for each application for authorisation. If a service is within the jurisdiction of multiple competent authorities, multiple applications for authorisation may be required.

6. If a Party requires authorisation for the supply of a service, it shall ensure that its competent authorities, to the extent practicable, permit submission of an application at any time throughout the year. (10) If a specific time period for applying exists, the Party shall ensure that the competent authorities allow a reasonable period for the submission of an application.

(10) Competent authorities are not required to start considering applications outside of their official working hours and working days.

7. If a Party requires authorisation for the supply of a service, it shall ensure that its competent authorities:

- (a) taking into account their competing priorities and resource constraints, endeavour to accept applications in electronic format; and
- (b) accept copies of documents, that are authenticated in accordance with the Party's domestic laws and regulations, in place of original documents, unless the competent authorities require original documents to protect the integrity of the authorisation process.

8. If a Party requires authorisation for the supply of a service, it shall ensure that its competent authorities:

- (a) to the extent practicable, provide an indicative timeframe for processing of an application;
- (b) at the request of the applicant, provide without undue delay information concerning the status of the application;
- (c) to the extent practicable, ascertain without undue delay the completeness of an application for processing under the Party's domestic laws and regulations;
- (d) if they consider an application complete for processing under the Party's domestic laws and regulations, (11) within a reasonable period of time after the submission of the application ensure that:

(11) Competent authorities may require that all information is submitted in a specified format to consider it "complete for processing".

(i) the processing of the application is completed; and

(ii) the applicant is informed of the decision concerning the application, (12) to the extent possible in writing; (13)

(12) Competent authorities may meet this requirement by informing an applicant in advance in writing, including through a published measure, that lack of response after a specified period of time from the date of submission of an application indicates acceptance of the application or rejection of the application.

(13) "In writing" may include in electronic form.

(e) if they consider an application incomplete for processing under the Party's domestic laws and regulations, within a reasonable period of time, to the extent practicable:

(i) inform the applicant that the application is incomplete;

(ii) at the request of the applicant, identify the additional information required to complete the application, or otherwise provide guidance on why the application is considered incomplete; and

(iii) provide the applicant with the opportunity (14) to provide the additional information that is required to complete the application,

(14) Such opportunity does not require a competent authority to provide extensions of deadlines.

however, if none of the above is practicable, and the application is rejected due to incompleteness, ensure that they so inform the applicant within a reasonable period of time; and

(f) if an application is rejected, to the extent possible, either upon their own initiative or upon request of the applicant, inform the applicant of the reasons for rejection and, if applicable, the procedures for resubmission of an application. An applicant should not be prevented from submitting another application (15) solely on the basis of a previously rejected application.

(15) Competent authorities may require that the content of such an application has been revised.

9. The competent authorities of a Party shall ensure that authorisation, once granted, enters into effect without undue delay, subject to applicable terms and conditions.(16)

(16) Competent authorities are not responsible for delays due to reasons outside their competence.

10. Each Party shall ensure that the authorisation fees (17) charged by its competent authorities are reasonable, transparent, based on authority set out in a measure, and do not in themselves restrict the supply of the relevant service.

(17) Authorisation fees do not include fees for the use of natural resources, payments for auction, tendering or other non-discriminatory means of awarding concessions, or mandated contributions to universal service provision.

11. If a Party requires an examination for authorisation for the supply of a service, that Party shall ensure that its competent authorities schedule such an examination at reasonably frequent intervals and provide a reasonable period of time to enable applicants to request to take the examination. Having regard to the cost, administrative burden, and the integrity of the procedures involved, the Parties are encouraged to accept requests in electronic format to take such examinations, and to consider, to the extent practicable, the use of electronic means in other aspects of examination processes.

12. If a Party adopts or maintains measures relating to the authorisation for the supply of a service, the Party shall ensure that its competent authorities reach and administer their decisions in a manner independent from any supplier of the service for which authorisation is required.(18)

(18) For greater certainty, this provision does not mandate a particular administrative structure; it refers to the decision-making process and

administering of decisions.

13. Each Party shall encourage its competent authorities, when adopting technical standards, to adopt technical standards developed through open and transparent processes, and shall encourage any body, including relevant international organisations, (19) designated to develop technical standards, to use open and transparent processes.

(19) The term "relevant international organisations" refers to international bodies whose membership is open to the relevant bodies of each Party.

Article 9.14. Recognition

1. For the purposes of the fulfilment, in whole or in part, of its standards or criteria for the authorisation, licensing or certification of service suppliers, and subject to paragraph 3, a Party may recognise, or encourage its relevant competent bodies to recognise, the education or experience obtained, requirements met, or licences or certifications granted in a non-party. Such recognition, which may be achieved through harmonisation or otherwise, may be based upon an agreement or arrangement between the Parties or their relevant competent bodies, or may be accorded autonomously.
2. If a Party recognises, autonomously or by agreement or arrangement, the education or experience obtained, requirements met, or licences or certifications granted, in the territory of a non-party, nothing in Article 9.5 (Most-Favoured-Nation Treatment) shall be construed to require the Party to accord recognition to the education or experience obtained, requirements met, or licences or certifications granted, in the territory of the other Party.
3. Where a Party recognises, by agreement or arrangement, the education or experience obtained, requirements met, or licenses or certifications granted in the territory of a non-party of the type referred in paragraph 1, that Party shall afford the other Party adequate opportunity to negotiate its accession to such an agreement or arrangement, whether existing or future, or to negotiate a comparable agreement or arrangement with it. Where a Party accords recognition autonomously, it shall afford adequate opportunity for the other Party to demonstrate that the education, experience, licences or certifications obtained or requirements met in that other Party's territory should also be recognised.
4. A Party shall not accord recognition in a manner which would constitute a means of discrimination between the other Party and non-parties in the application of its standards or criteria for the authorisation, licensing or certification of service suppliers, or a disguised restriction on trade in services.

Article 9.15. Professional Services

1. The Parties recognise that professional services play an essential role in facilitating trade and investment across both goods and services sectors and in promoting economic growth and business confidence.
2. Each Party shall endeavour to encourage its relevant professional service bodies to strengthen cooperation and establish dialogues with the relevant professional service bodies of the other Party with a view to:
 - (a) sharing knowledge and expertise in advancing the development of best practice in accreditation, licensing and regulation of professions;
 - (b) pursuing mutually acceptable standards and criteria for accreditation, licensing and registration with respect to professional service sectors; and
 - (c) streamlining the recognition of professional qualifications and licensing or registration procedures, including through the negotiation of mutual recognition or similar arrangements in professional services sectors of mutual interest.
3. Each Party shall encourage its relevant professional service bodies to consider, where appropriate, existing international frameworks - both plurilateral and multilateral - that relate to professional services as pathways to mutual recognition or similar arrangements.
4. In accordance with its laws and regulations, each Party shall encourage relevant professional service bodies to consider implementing procedures that:
 - (a) allow for the temporary, or project-specific licensing of professional service suppliers of the other Party. Such a regime should not operate to prevent a professional of the other Party from gaining a local licence once that professional satisfies the applicable local licensing requirements; and

(b) permits professional services firms of the other Party, respecting conventions of the Party ("host Party") on the use of firm names, to use a firm name of their choice in the host Party's jurisdiction.

5. Each Party shall encourage its relevant professional service bodies to administer policy and processes in a manner that is as transparent and streamlined as possible.

6. Further to Article 9.20 (Review), the Parties shall review the progress of implementing this Article and consider initiatives to further promote the recognition of professional qualifications, registration and temporary licensing, including through the possible negotiation of a separate Annex on Professional Services.

7. Nothing in this Article shall prevent a Party from requiring that natural persons possess the necessary qualifications, professional experience, credentials, or other criteria specified under each Party's laws and regulations in the jurisdiction of the Party where the service is supplied.

Article 9.16. Payments and Transfers

1. Except under circumstances envisaged in Article 24.4 (Restrictions to Safeguard the Balance of Payments - General Provisions and Exceptions), a Party shall not apply restrictions on international transfers and payments for current transactions relating to its commitments.

2. Nothing in this Chapter shall affect the rights and obligations of the Parties as members of the International Monetary Fund (IMF) under the IMF Articles of Agreement, including the use of exchange actions which are in conformity with the IMF Articles of Agreement, provided that a Party shall not impose restrictions on any capital transactions inconsistently with its obligations regarding such transactions, except under Article 24.4 (Restrictions to Safeguard the Balance of Payments - General Provisions) or at the request of the IMF.

Article 9.17. Monopolies and Exclusive Service Suppliers

1. A Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitments) or Article 9.9 (Schedules of Non-Conforming Measures and Reservations) shall ensure that any monopoly supplier of a service in its territory does not, in the supply of the monopoly service in the relevant market, act in a manner inconsistent with the Party's obligations under Article 9.4 (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment), Article 9.6 (Market Access), and for a Party making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures and Reservations), Article 9.7 (Local Presence), subject to any conditions or qualifications set out in Annex 9D (Schedules of Specific Commitments) or except as provided for in Annex 9E (Schedules of Non-Conforming Measures and Reservations).

2. Where a Party's monopoly supplier of a service competes, either directly or through an affiliated company, in the supply of a service outside the scope of its monopoly rights and which is subject to that Party's obligations under Article 9.4, (National Treatment), Article 9.5 (Most-Favoured-Nation Treatment) or Article 9.6 (Market Access), which are subject to any conditions or qualifications set out in Annex 9D (Schedules of Specific Commitments) or non-conforming measures set out in Annex 9E (Schedules of Non-Conforming Measures and Reservations); that Party shall ensure that such supplier does not abuse its monopoly position to act in its territory in a manner inconsistent with such obligations.

3. If a Party has reason to believe that a monopoly supplier of a service of the other Party is acting in a manner inconsistent with paragraphs 1, 2 or 3, it may request the other Party establishing, maintaining or authorising such monopoly supplier to provide information concerning the supplier's relevant operations in its territory.

4. This Article shall also apply to cases of exclusive service suppliers, where a Party, formally or in effect:

(a) authorises or establishes a small number of service suppliers; and

(b) substantially prevents competition among those suppliers in its territory.

Article 9.18. Business Practices

1. The Parties recognise that certain business practices of service suppliers, other than those falling under Article 9.17 (Monopolies and Exclusive Service Suppliers), may restrain competition and thereby restrict trade in services.

2. Each Party shall, on request of the other Party, enter into consultations with a view to eliminating practices referred to in paragraph 1. The requested Party shall accord full and sympathetic consideration to such a request and shall cooperate through the supply of publicly available non-confidential information of relevance to the matter in question. The requested Party may also provide other information available to the requesting Party, subject to its laws and regulations and to the

conclusion of a satisfactory agreement concerning the safeguarding of its confidentiality by the requesting Party.

Article 9.19. Denial of Benefits

1. A Party may deny the benefits of this Chapter:

- (a) to the supply of any service, if it establishes that the service is supplied from or in the territory of a non-party;
- (b) to a service supplier that is a juridical person, if it establishes that it is not a service supplier of the other Party;
- (c) in the case of the supply of a maritime transport service, if it establishes that the service is supplied:
 - (i) by a vessel registered under the laws and regulations of a non-party; and
 - (ii) by a person of a non-party which operates or uses the vessel in whole or in part.

2. A Party may deny the benefit of this Chapter to a service supplier of the other Party, if the service supplier is a juridical person owned or controlled by persons of a non-party, and the denying Party adopts or maintains measures with respect to the non-party or a person of the non-party that prohibit transactions with the juridical person or that would be violated or circumvented if the benefits of this Chapter were accorded to the juridical person.

3. A Party may deny the benefits of this Chapter to a service supplier of the other Party if the service supplier is a juridical person owned or controlled by persons of a non-party or of the denying Party that has no substantial business activities in the territory of the other Party.

Article 9.20. Review

1. In any review of this Agreement conducted in accordance with Article 26.5 (Final Provisions), the Parties shall review this Chapter and related Annexes and Schedules so as to progressively liberalise trade in services between the Parties.

2. Further to paragraph 1, the Parties shall review their approach to the scheduling of commitments in accordance with Article 9.8 (Scheduling of Commitments), including whether a Party making commitments in accordance with Article 9.8 (Schedules of Specific Commitments) considers it appropriate to transition to making commitments in accordance with Article 9.9 (Schedules of Non-Conforming Measures).

3. Where a Party unilaterally liberalises a measure affecting market access of a service supplier or suppliers of the other Party, the other Party may request consultations to discuss the measure. Following such consultations, if the Parties agree to incorporate the liberalised measure into the Agreement as a new commitment, the relevant Schedule shall be amended.

Article 9A.2. Scope

1. This Annex shall apply to measures taken by a Party affecting the supply of financial services. Reference to the supply of a financial service in this Annex shall mean the supply of a service as defined in subparagraph (x) of Article 9.1 (Definitions – Trade in Services).

2. For the purposes of this Annex, “services supplied in the exercise of governmental authority” as referred to in subparagraph (r) of Article 9.1 (Definitions – Trade in Services) means the following:

4. The definition of “service supplied in the exercise of government authority” in subparagraph (v) of Article 9.1 (Definitions – Trade in Services) shall not apply to services covered by this Annex.

5. Article 9.7 (Local Presence – Trade in Services) shall not apply to services covered by this Annex.

6. In the event of any inconsistency between this Annex and any other provision in this Agreement, this Annex shall prevail to the extent of the inconsistency.

Article 9A.3. Financial Services Exceptions

1. For greater certainty, nothing in this Annex shall be construed to prevent a Party from adopting or enforcing measures necessary to secure compliance with laws or regulations that are not inconsistent with this Annex, including those relating to the prevention of deceptive and fraudulent practices or to deal with the effects of a default on financial services contracts, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between the Parties or between the Parties and non-Parties where like conditions prevail, or a disguised restriction on trade in financial services.

2. For greater certainty, in accordance with Article 9A.2 (Scope) of this Annex, Chapter 9 (Trade in Services) shall not apply to activities conducted by a central bank or monetary authority or by any other public entity in pursuit of monetary or exchange rate policies within the territory of each Party.

3. Chapter 9 (Trade in Services) shall not apply to non-discriminatory measures of general application taken by any public entity in pursuit of related credit policies. This paragraph shall not affect a Party's obligations under Article 9.16 (Payments and Transfers – Trade in Services).

4. Notwithstanding Article 9.16 (Payments and Transfers – Trade in Services) a Party may prevent or limit transfers by a financial service supplier to, or for the benefit of, an affiliate of or person related to such institution or supplier through the equitable, non-discriminatory and good faith application of measures relating to maintenance of the safety, soundness, integrity, or financial responsibility of financial service suppliers. This paragraph does not prejudice any other provision of this Agreement that permits a Party to restrict transfers.

Article 9A.4. Prudential Measures

Notwithstanding any other provision of this Agreement except for Chapter 2 (Trade in Goods), Chapter 3 (Rules of Origin), Chapter 4 (Customs Procedures and Trade Facilitation), Chapter 6 (Sanitary and Phytosanitary Measures), and Chapter 8 (Technical Barriers to Trade), a Party shall not be prevented from adopting or maintaining measures for prudential reasons, (3) including for the protection of investors, depositors, policy-holders, or persons to whom a fiduciary duty is owed by a financial service supplier, or to ensure the integrity and stability of the financial system. Where such measures do not

conform with the provisions of this Agreement to which this exception applies, they shall not be used as a means of avoiding the Party's commitments or obligations under those provisions.

(3) The Parties understand that "prudential reasons" includes the maintenance of the safety, soundness, integrity, or financial responsibility of individual financial service suppliers, as well as the safety and financial and operational integrity of clearing and settlement systems.

Article 9A.5. Financial Services New to the Territory of a Party

Each Party shall permit a financial service supplier of the other Party established in its territory, to supply a new financial service of a type similar to those services it would permit its own financial service suppliers to supply, in like circumstances, subject to its applicable laws and regulations. A Party may determine the institutional or juridical form through which the new financial services may be supplied and may require authorisation for the supply of such services. Where a Party requires such authorisation of the new financial services, it shall provide its decision within a reasonable time.

Article 9A.6. Treatment of Financial Services Information

Nothing in this Agreement shall be construed to require a Party to disclose information relating to the affairs and accounts of individual customers, or any confidential or proprietary information in the possession of public entities.

Article 9A.7. Recognition of Prudential Measures

1. A Party may recognise prudential measures of any international standard setting body,⁴ the other Party, or a non-party in determining how the Party's measures relating to financial services shall be applied.⁵ Such recognition, which may be achieved through harmonisation or otherwise, may be based upon an agreement or arrangement with the international standard setting body, the other Party, or the non-party concerned, or may be accorded autonomously.

2. Where a Party is a party to such an agreement or arrangement referred to in paragraph 1, whether future or existing, that Party, shall provide adequate opportunity for the other Party to negotiate accession to such an agreement or arrangements, or to negotiate a comparable agreement or arrangement with it, under circumstances in which there would be equivalent regulation, oversight, implementation of such regulation, and, if appropriate, procedures concerning the sharing of information between the parties to the agreement or arrangement.

3. Where a Party accords recognition autonomously, it shall afford adequate opportunity for the other Party to demonstrate that such circumstances as referred to in paragraph 2 exist.

4 "International standard setting body" refers to international standard setting bodies whose membership is open to the relevant bodies of at least both Parties.

5 For greater certainty, nothing in Article 9.5 (Most-Favoured-Nation Treatment – Trade in Services) shall be construed to require the Party to accord such recognition to prudential measures of the other Party.

Article 9A.8. Self-Regulatory Organisations

If a Party requires a financial service supplier of the other Party to be a member of, participate in, or have access to, a self-regulatory organisation to supply a financial service in or into the territory of that Party, or when the Party provides privileges or advantages directly or indirectly to financial service suppliers supplying financial services through a self-regulatory organisation, then the requiring Party shall ensure that the self-regulatory organisation observes the obligations contained in Article 9.4 (National Treatment – Trade in Services) and Article 9.5 (Most-Favoured-Nation Treatment – Trade in Services).

Article 9A.9. Payment and Clearing Systems

Under terms and conditions that accord national treatment, each Party shall grant financial service suppliers of the other Party, established in its territory through commercial presence as defined in subparagraph (c) of Article 9.1 (Definitions – Trade in Services), access to payment and clearing systems operated by public entities and to official funding and refinancing facilities available in the normal course of ordinary business. This Article is not intended to confer access to the Party's lender of last resort facilities.⁽⁶⁾

(6) For greater certainty, a Party need not grant access under this Article to a financial service supplier of the other Party established in its territory through commercial presence as defined in subparagraph (c) of Article 9.1 (Definitions – Trade in Services) if such access or treatment is not granted to its own like financial service suppliers.

Article 9A.10. Shariah-Compliant Financial Services

The Parties recognise that a Shariah-compliant financial service is a financial service for the purposes of Article 9A.1 (Definitions). Accordingly, each Party shall consider applications by financial service suppliers of the other Party established in its territory through commercial presence as defined in subparagraph (c) of Article 9.1 (Definitions – Trade in Services) to supply such services in its territory, on an equal basis as any other application to supply financial services, consistent with its laws and regulations including any regulatory or supervisory requirements, and in accordance with its commitments and obligations under this Annex.

Article 9A.11. Sustainable Finance

1. The Parties recognise the importance of international cooperation to facilitate the inclusion of environmental, social, and governance considerations in investment decision-making and other business activities, in order, thereby, to increase investment in sustainable activities.
2. The inclusion of environmental considerations in investment decision-making and other business activities involves, inter alia, the assessment and pricing of climate-related risks and opportunities, and the exploration of environmental and sustainable projects and infrastructure.
3. The Parties acknowledge the importance of encouraging financial service suppliers to develop an approach to managing climate-related financial risks. Specifically, the Parties recognise the importance of encouraging the uptake of climate-related financial disclosures for financial service suppliers with material exposure to climate change, including forward-looking information, informed by initiatives in international fora.
4. The Parties shall cooperate in relevant international fora, and where agreeable, in the development and adoption of internationally recognised standards for the inclusion of environmental, social, and governance considerations in investment decision-making and other business activities.

Article 9A.12. Dispute Settlement

Panels established pursuant to Chapter 25 (Dispute Settlement) to examine matters relating to disputes on prudential issues and other financial matters shall have the necessary expertise relevant to the specific financial service in dispute.

4. Notwithstanding paragraph 3, a Party may take such measures as are necessary to ensure the security and confidentiality of messages and protect the personal information of end-users of public telecommunications networks or services, provided that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction on trade in services.

5. Each Party shall ensure that no condition is imposed on access to and use of public telecommunications networks and services, other than as necessary to:

(a) under non-discriminatory terms, conditions, including technical standards and specifications, and rates;

2. Each Party shall ensure that a major supplier in its territory offers access to network elements on an unbundled basis for the supply of public telecommunications services on terms and conditions that are reasonable, non-discriminatory and transparent. (a) at any time; or

(b) after a reasonable period of time which has been made publicly known,

Article 9B.6. Number Portability

Article 9B.7. Resale

Each Party may determine, in accordance with its laws and regulations, which public telecommunications services must be offered for resale by a major supplier based on the need to promote competition or to benefit the long-term interests of end-users. Where a Party has determined that a service must be offered for resale by a major supplier, that Party shall ensure that suppliers of public telecommunications networks or services in its territory do not impose unreasonable or discriminatory conditions or limitations on the resale of those services by suppliers of public telecommunications networks or services of the other Party.

Article 9B.8. Treatment by Major Suppliers

Each Party shall ensure that any major supplier in its territory accords to suppliers of public telecommunications networks and services of the other Party treatment no less favourable than that such major supplier accords in like circumstances to its subsidiaries and affiliates, or non-affiliated service suppliers regarding:

- (a) the availability, provisioning, rates or quality of like public telecommunications networks or services; and
- (b) the availability of technical interfaces necessary for interconnection.

Article 9B.9. Competitive Safeguards

1. Each Party shall, through its relevant authorities, adopt or maintain appropriate measures for the purpose of preventing suppliers who, alone or together, are a major supplier in its territory from engaging in or continuing anti-competitive practices.

2. The anti-competitive practices referred to in paragraph 1 shall include in particular:

- (a) engaging in anti-competitive cross-subsidisation;
- (b) using information obtained from competitors with anti-competitive results; and

Article 9B.11. Co-location and Access to Facilities

1. Each Party shall ensure that a major supplier in its territory allows suppliers of public telecommunications networks or services of another Party to locate, at the major supplier's premises, their equipment necessary for interconnection or access to unbundled network elements. Each Party shall endeavour to ensure that such co-location is provided on a timely basis and on terms and conditions, including technical feasibility and space availability where applicable, and at rates, that are reasonable, non-discriminatory, and transparent.

2. Where physical co-location is not practical for technical reasons or because of space limitations, each Party shall endeavour to ensure that a major supplier in its territory provides an alternative solution, on a timely basis and on terms and conditions, and at rates, that are reasonable, non-discriminatory, and transparent.

3. A Party may determine in accordance with its laws and regulations which premises owned or controlled by major

suppliers in its territory are subject to paragraphs 1 and 2, having regard to factors such as the state of competition in the market where co-location is required, and whether such premises can feasibly be economically or technically substituted in order to provide a competing service.

Article 9B.12. Universal Service

Each Party has the right to define the kind of universal service obligations it wishes to maintain. Such obligations shall not be regarded as anti-competitive per se, provided that they are administered in a transparent, non-discriminatory and competitively neutral manner.

Article 9B.13. Public Availability of Licensing Criteria

1. Where a licence is required for the supply of a telecommunications service, a Party shall make publicly available:

- (a) all the licensing criteria and procedures that it applies;

2. Each Party shall ensure that the regulatory decisions made and procedures used by its telecommunications regulatory body and telecommunications dispute resolution bodies are impartial with respect to all market participants.

3. Telecommunications regulatory bodies and telecommunications dispute resolution bodies may not accord more favourable treatment to a supplier of public telecommunications networks or services in a Party's territory than that it accords to a like supplier of the other Party on the basis that the supplier receiving more favourable treatment is owned, wholly or in part, by the Party.

Article 9B.15. Allocation of Scarce Resources

1. Each Party shall administer its procedures for the allocation and use of scarce telecommunications resources, including assignment of frequencies, access to numbers and rights of way, in an objective, timely, transparent and non-discriminatory manner.

2. Each Party shall make publicly available the current state of allocated frequency bands, but shall not be required to provide detailed identification of frequencies assigned for specific government uses.

3. Each Party retains the right to establish and apply spectrum and frequency management policies which may affect the number of suppliers of public telecommunications networks or services, provided that it does so in a manner consistent with this Agreement. Each Party also retains the right to allocate frequency bands taking into account current and future needs and spectrum availability.

4. When making a spectrum allocation for commercial telecommunications services, each Party shall endeavour to rely on an open and transparent process that considers the public interest, including the promotion of competition.

Article 9B.16. Transparency

1. Each Party shall endeavour to ensure that telecommunications service suppliers are provided an opportunity to comment on a regulatory decision of general application that its telecommunications regulatory authority proposes.

2. Each Party shall ensure that relevant information on conditions affecting access to and use of public telecommunications networks and services is publicly available, including information on:

- (a) tariffs and other terms and conditions of service;
- (b) specifications of technical interfaces with such networks and services;
- (c) information on bodies responsible for the preparation and adoption of standards affecting such access and use;

Article 9B.17. International Mobile Roaming

1. The Parties shall endeavour to cooperate on promoting transparent and reasonable rates for international mobile roaming services that can help promote the growth of trade between the Parties and enhance consumer welfare.

2. A Party may take steps to enhance transparency and competition with respect to international mobile roaming services, such as:

- (a) ensuring that information regarding retail rates is easily accessible to consumers; and
- (b) minimising impediments to roaming, whereby consumers, when visiting the territory of a Party from the territory of the other Party, can access telecommunications services using the device of their choice.

3. Nothing in this Article shall require a Party to regulate rates or conditions for international mobile roaming services.

Article 9B.18. Submarine Cable Systems

1. The Parties recognise the importance of ensuring that submarine cable systems are resilient and secure. Accordingly, each Party shall endeavour to support efforts by submarine cable system operators to:

- (b) public demarcation of areas within which submarine cable systems are present and where activities are banned within that area to protect submarine cable systems; or
- (c) activities to promote awareness of submarine cable systems.

3. The Parties shall endeavour to cooperate on promoting submarine cable system resilience and security, including through supporting the work of international bodies focused on cable repair, safety and maintenance as they develop recommendations for safe, efficient, resilient, and redundant cable capacity and operations.

4. The Parties recognise the importance of expeditious and efficient installation, maintenance and repair of submarine cable systems to national, regional, and global telecommunications connectivity. Each Party shall endeavour to ensure that, to the extent possible, a person of the other Party who operates, owns or controls submarine cable systems has flexibility to choose secure and verifiable suppliers of installation, maintenance or repair services, including from either Party or a non-Party, in accordance with its laws and regulations.

Article 9B.19. Flexibility In the Choice of Technology

1. The Parties shall not prevent a supplier of public telecommunications services from choosing the technologies it wishes to use to supply its services.
2. Notwithstanding paragraph 1, a Party may apply a measure that limits the technologies that a supplier of public telecommunications networks or services may use to supply its services, provided that the measure is designed to achieve a legitimate public policy interest and is not prepared, adopted or applied in a manner that creates unnecessary obstacles to trade in services.
3. If a Party finances the development of advanced networks, including broadband networks, it may make its financing conditional on the use of technologies that meet its legitimate public policy interests.

Article 9B.20. Relation to International Organisations

The Parties recognise the importance of international standards for global compatibility and inter-operability of telecommunications networks and services and endeavour to promote such standards through the work of relevant international organisations.

Article 9B.21. Relationship to other Chapters

In the event of any inconsistency between this Annex and other Chapters of this Agreement, this Annex shall prevail to the extent of the inconsistency.

Article 9B.22. Cooperation

1. The Parties recognise the transformational impact of communications networks, infrastructure, and technologies, including those that are new and emerging, and the importance of these technologies to the Parties' respective economies and societies.
2. Accordingly, each Party shall take measures to:
 - (a) encourage a diverse and competitive market for telecommunications services and networks in its territory; and
 - (b) protect the security and integrity of its telecommunications infrastructure.
3. The Parties shall endeavour to:
 - (a) exchange information on the opportunities and challenges associated with communication networks, infrastructure, and technologies;
 - (b) work together in regional and multilateral fora to promote a shared approach to these opportunities and challenges; and
 - (c) exchange information and experience in spectrum management.

Article 9B.23. Dispute Settlement and Appeal

1. Each Party shall ensure that suppliers of public telecommunications networks or services of the other Party have timely recourse to its telecommunications regulatory body or telecommunications dispute resolution bodies to resolve disputes arising under this Annex in accordance with its laws and regulations.
2. Each Party shall ensure that any supplier of public telecommunications networks or services aggrieved by a determination or decision of its relevant telecommunications regulatory body may, in accordance with its laws and regulations, obtain review of, or have the opportunity to appeal such determination or decision.
3. The Parties shall not permit the making of an application for review to constitute grounds for non-compliance with the determination or decision of the telecommunications regulatory body, unless the relevant body otherwise determines.

Article 9B.24. Enforcement

Each Party shall provide its competent authority with the authority to enforce the Party's measures relating to the

obligations set out in Articles 9B.4 through 9B.7. Such authority shall include the ability to impose or seek from administrative or judicial bodies, effective sanctions, which may include financial penalties, injunctive relief, on an interim or final basis, or the modification, suspension, or revocation of licences.

(Note: The inclusion of representational services before administrative agencies and other duly constituted official tribunals within the context of legal services does not necessarily mean that a licensed lawyer must supply such services in all cases. The precise scope of services subject to licensing requirements is subject to the discretion of the relevant regulatory authority.) Does not include documentation services performed by service suppliers entrusted with public functions, such as notary services, or services provided by patent or trademarks attorneys. The mediator has no advisory or determinative role in regard to the content of the dispute or the outcome of its resolution, but may advise on or determine the process of mediation whereby resolution is attempted. "conciliation" is taken to mean a process in which the parties to a dispute, with the assistance of a dispute resolution practitioner (the conciliator), identify the issues in dispute, develop options, consider alternatives and endeavour to reach an agreement. The conciliator may have an advisory role on the content of the dispute or the outcome of its resolution, but not a determinative role. The conciliator may advise on or determine the process of conciliation whereby resolution is attempted, and may make suggestions for terms of settlement, give expert advice on likely settlement terms, and may actively encourage the participants to reach an agreement.

A Party may require a concise and accurate description, or graphical representation, or both, as applicable, of the trademark.

Article 14.14. Collective and Certification Marks

Each Party shall provide that trademarks include collective marks and certification marks. A Party is not obligated to treat certification marks as a separate category in its law, provided that those marks are protected. Each Party shall also provide that signs that may serve as geographical indications are capable of protection under its trademark system. (3)

(3) Consistent with Article 14.26 (Protection of Geographical Indications), any sign or combination of signs shall be eligible for protection under one or more of the legal means for protecting geographical indications, or a combination of such means.

Article 14.15. Use of Identical or Similar Signs

Each Party shall provide that the owner of a registered trademark has the exclusive right to prevent third parties that do not have the owner's consent from using in the course of trade identical or similar signs, including subsequent geographical indications, for goods or services that are identical or similar to those goods or services in respect of which the owner's trademark is registered, where such use would result in a likelihood of confusion.

In the case of the use of an identical sign for identical goods or services, a likelihood of confusion shall be presumed. (4) (5)

(4) For greater certainty, the exclusive right in this Article applies to cases of unauthorised use of geographical indications with goods for which the trademark is registered, in cases in which the use of that geographical indication in the course of trade would result in a likelihood of confusion as to the source of the goods.

(5) For greater certainty, the Parties understand that this Article should not be interpreted to affect their rights and obligations under Articles 22 and 23 of the TRIPS Agreement.

Article 14.16. Exceptions

A Party may provide limited exceptions to the rights conferred by a trademark, such as fair use of descriptive terms, provided that those exceptions take account of the legitimate interest of the owner of the trademark and of third parties.

Article 14.17. Protection of Trademarks That Predate Geographical Indications

Each Party shall protect trademarks where they predate, in its jurisdiction, geographical indications, in accordance with the TRIPS Agreement.

Article 14.18. Well-Known Trademarks

1. Each Party shall provide for appropriate measures to refuse or cancel the registration, and to prohibit the use, (6) of a trademark that is identical or similar to a well-known trademark (7), (8) for identical or similar goods or services, if the use of that trademark is likely to cause confusion with the prior well-known trademark.

2. No Party shall require, as a condition for determining that a trademark is a well-known trademark, that the trademark has been registered in that Party or in another jurisdiction, included on a list of well-known trademarks, or given prior recognition as a well-known trademark.

(6) For greater certainty, a Party may comply with the obligation to provide for appropriate measures to prohibit the use of the trademark that is identical or similar to a well-known trademark under this paragraph by providing its judicial authorities with the authority to prohibit the use of such a trademark.

(7) For the purposes of this paragraph, a Party may treat "a reproduction, an imitation, or a translation of a well-known trademark" as "identical or similar to a well-known trademark".

(8) The Parties understand that a well-known trademark is one that was already well-known before, as determined by a Party, the application for, registration of, or use of the first-mentioned trademark.

Article 14.19. Bad Faith Trademarks (9)

Each Party shall provide that its competent authority has the authority to refuse an application or cancel a registration where the application to register the trademark was made in bad faith in accordance with its laws and regulations.

(9) For the purposes of this Article, the competent authority of a Party may take into consideration whether the trademark is identical or similar to a well-known trademark of another person.

Article 14.20. One and the Same Application Relating to Several Goods or Services

Each Party shall provide that one and the same application for registration of a trademark may relate to several goods or services, or any combination thereof, irrespective of whether they belong to one class or to several classes of the Nice Classification.

Each Party shall adopt or maintain a trademark classification system that is consistent with the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, done at Nice on 15 June 1957, ("Nice Classification"). Each Party shall provide that:

(a) registrations and the publications of applications indicate the goods and services by their names, grouped according to the classes established by the Nice Classification; (10) and

(b) goods or services may not be considered as being similar to each other on the ground that, in any registration or publication, they are classified in the same class of the Nice Classification. Conversely, each Party shall provide that goods or services may not be considered as being dissimilar from each other on the ground that, in any registration or publication, they are classified in different classes of the Nice Classification.

(10) A Party that relies on translations of the Nice Classification shall follow updated versions of the Nice Classification to the extent that official translations have been issued and published.

Article 14.24. Term of Protection for Trademarks

Each Party shall provide that initial registration and each renewal of registration of a trademark is for a term of no less than 10 years.

Article 14.25. Non-Recordal of a License

No Party shall require recordal of trademark licenses:

(b) as a condition for use of a trademark by a licensee to be deemed to constitute use by the holder in a proceeding that relates to the acquisition, maintenance or enforcement of trademarks.

Section D. Geographical Indications

Article 14.26. Protection of Geographical Indications

Each Party shall ensure in its laws and regulations adequate and effective means to protect geographical indications. Each Party recognises that such protection may be provided through a trademark system, a sui generis system, or other legal means, provided that all requirements under the TRIPS Agreement are fulfilled. (11)

(11) For greater certainty, Parties understand that this does not limit exceptions available under the TRIPS agreement, including its Article 24.

Article 14.27. Procedures for the Protection of Geographical Indications

The Parties shall provide procedures for the protection of Geographical Indications including for application and opposition, and ensure that their laws, regulations and guidance are readily available to the public.

(13) Subject to paragraph 3, patents shall be available and patent rights enjoyable without discrimination as to the place of invention, the field of technology, and whether products are imported or locally produced.

2. A Party may exclude from patentability inventions, the prevention within its territory of the commercial exploitation of which is necessary to protect public order or morality, including to protect human, animal or plant life or health, or to avoid serious prejudice to the environment, provided that such exclusion is not made merely because the exploitation is prohibited by its laws and regulations.

3. A Party may also exclude from patentability:

(a) diagnostic, therapeutic, and surgical methods for the treatment of humans or animals; and

(b) plants and animals other than micro-organisms, and essentially biological processes for the production of plants or animals other than non-biological and microbiological processes. However, each Party shall provide for the protection of plant varieties either by patents or by an effective sui generis system or by any combination thereof. The Parties shall review this subparagraph upon any amendment to subparagraph 3(b) of Article 27 of the TRIPS Agreement with a view to deciding whether to adopt a similar amendment to this subparagraph.

(13) For the purposes of this Section, "inventive step" and "capable of industrial application" may be deemed by a Party to be synonymous with "non-obvious" and "useful", respectively.

Article 14.30. Rights Conferred

1. Each Party shall provide that a patent shall confer on its owner the following exclusive rights:

(a) where the subject matter of a patent is a product, to prevent third parties not having the owner's consent from the acts of making, using, offering for sale, selling, or importing (14) for these purposes that product; and

(b) where the subject matter of a patent is a process, to prevent third parties not having the owner's consent from the act of using the process, and from the acts of using, offering for sale, selling, or importing for these purposes at least the product obtained directly by that process.

2. Patent owners shall also have the right to assign, or transfer by succession, the patent and to conclude licensing contracts.

Article 14.31. Grace Period

Each Party shall disregard information contained in public disclosure (15) used to determine if an invention is novel or has an inventive step if the public disclosure:

Article 14.32. 18-Month Publication

1. Each Party shall publish any patent application promptly after the expiry of 18 months from its filing date or, if priority is claimed, from its earliest priority date, unless the application has been published earlier, or has been withdrawn,

abandoned or refused. (17)

2. If a pending application is not published promptly in accordance with paragraph 1, the Party shall publish that application or the corresponding patent as soon as practicable.

Article 14.36. Other Use without Authorisation of the Right Holder

For greater certainty, nothing in this Agreement shall limit a Party's rights and obligations under Article 31 and Article 31bis of the TRIPS Agreement, and the Annex and Appendix to the Annex to the TRIPS Agreement.

Article 14.37. Experimental Use of a Patent

Without limiting Article 14.35 (Exceptions), each Party may, in accordance with its laws and regulations, provide that any person may do an act that would otherwise infringe a patent if the act is done for experimental purposes (18) relating to the subject matter of a patented invention.

(18) For greater certainty, each Party may determine, consistent with Article 14.35 (Exceptions), what acts fall within the meaning of "experimental purposes".

Article 14.38. Regulatory Review: Exception

Without prejudice to the scope of, and consistent with, Article 30 of TRIPS, each Party may, in accordance with its laws and

regulations, provide that a third person may do an act that would otherwise infringe a patent, if the act is done for purposes connected with obtaining regulatory approval in that Party, another country or both.

Each Party shall provide for the protection of new varieties of plants through an effective sui generis plant variety protection according to the Party's law and regulations.

Section F. Industrial Designs

2. Each Party confirms that protection for industrial designs is available for designs:

(a) embodied in a part of an article; or, alternatively;

(b) having a particular regard, where appropriate, to a part of an article in the context of the article as a whole, in accordance with its laws and regulations.

(c) the estimated value of recurring contracts of the same type of good or service to be awarded during the 12 months following the initial contract award or the procuring entity's fiscal year.

11. If the total estimated maximum value of a procurement over its entire duration is not known, the procurement shall be deemed a covered procurement, unless otherwise excluded under this Agreement.

Article 15.4. Exceptions

1. Subject to the requirement that the measure is not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between the Parties where the same conditions prevail, or a disguised restriction on international trade between the Parties, nothing in this Chapter shall be construed to prevent a Party, including its procuring entities, from adopting or maintaining a measure:

(a) necessary to protect public morals, order or safety;

(b) necessary to protect human, animal or plant life or health;

(c) necessary to protect intellectual property; or

(d) relating to the good or service of a person with disabilities, of philanthropic institutions or of prison labour.

2. The Parties understand that paragraph 1(b) includes environmental measures necessary to protect human, animal or plant life or health.

3. Nothing in this Chapter shall be construed to:

(a) require a Party to furnish or allow access to any information the disclosure of which it determines to be contrary to its essential security interests; or

(b) preclude a Party from applying measures that it considers necessary for the fulfilment of its obligations with respect to the maintenance or restoration of international peace or security, or the protection of its own essential security interests.

Article 15.5. General Principles

National Treatment and Non-Discrimination

1. With respect to any measure regarding covered procurement, each Party, including its procuring entities, shall accord immediately and unconditionally to the goods and services of the other Party and to the suppliers of the other Party, treatment no less favourable than the treatment that the Party, including its procuring entities, accords to domestic goods, services, and suppliers.

2. With respect to any measure regarding covered procurement, the Parties, including their procuring entities, shall not:

(a) treat a locally established supplier less favourably than another locally established supplier on the basis of the degree of foreign affiliation or ownership by a person of the other Party; or

(b) discriminate against a locally established supplier on the basis that the good or service offered by that supplier for a particular procurement is a good or service of the other Party.

3. All orders under contracts awarded for covered procurement shall be subject to paragraphs 1 and 2.

Conduct of Procurement

4. A procuring entity shall use an open tendering procedure for covered procurement unless Article 15.9 (Qualification of Suppliers) or Article 15.11 (Limited Tendering) applies.

5. A procuring entity shall conduct covered procurement in a transparent and impartial manner that:

(a) is consistent with this Chapter, using methods such as open tendering, selective tendering, and limited tendering;

(b) avoids conflicts of interest; and

(c) prevents corrupt practices.

Rules of Origin

6. For purposes of covered procurement, a Party shall not apply rules of origin to goods or services imported from or supplied from the other Party that are different from the rules of origin the Party applies at the same time in the normal course of trade to imports or supplies of the same goods or services from the same Party.

Measures Not Specific to Procurement

7. Paragraphs 1 and 2 shall not apply to customs duties and charges of any kind imposed on, or in connection with, importation, the method of levying those duties and charges, other import regulations or formalities, and measures affecting trade in services other than measures governing covered procurement.

Use of Electronic Means

8. The Parties shall endeavour to use and promote electronic means to the widest extent practicable for the publication of notices, tender documentation, information exchange and communication, and the submission of tenders.

9. When conducting covered procurement, a procuring entity shall use electronic means:

(a) for the publication of notices; and

(b) to the widest extent practicable, for information exchange and communication, the publication of tender documentation in procurement procedures, and for the submission of tenders.

10. When conducting covered procurement by electronic means, a procuring entity shall:

(a) ensure that the procurement is conducted using information technology systems and software, including those related to authentication and encryption of information, that are generally available and interoperable with other generally available information technology systems and software; and

(b) establish and maintain mechanisms that ensure the integrity of information exchanged with suppliers, including requests for participation and tenders, including establishment of the time of receipt and the prevention of inappropriate access.

Offsets

11. With regard to covered procurement, a Party, including its procuring entities, shall not seek, take account of, impose or enforce any offset, except as otherwise provided in its Schedule in Annex 15A (Schedule of the Parties).(1)

(1) For greater certainty, this paragraph applies only with respect to the UAE's In-Country Value certification holders policy, as specified in paragraph 2(b) of Section E of the UAE's Schedule to Annex 15A.

Article 15.6. Publication of Procurement Information

1. Each Party shall:

(a) promptly publish any law, regulation, judicial decision, administrative ruling of general application, standard contract clause mandated by law or regulation and incorporated by reference in notices or tender documentation and procedures regarding covered procurement, and any modifications thereof, in an officially designated electronic or paper medium that is widely disseminated and remains readily accessible to the public; and

(b) provide an explanation thereof to the other Party in response to an inquiry, on request.

2. Each Party shall list in Section G of its Schedule to Annex 15A (Schedule of the Parties):

(a) the paper or electronic means through which the Party publishes the information described in paragraph 1; and

(b) the electronic platform in which the Party publishes the notices required by Article 15.7 (Notices of Intended Procurement), paragraph 8 of Article 15.9 (Qualification of Suppliers), and paragraph 2 of Article 15.17 (Transparency and Post-Award Information).

3. Each Party shall promptly notify the other Party of any modification to the Party's information listed in Section G of its Schedule to Annex 15A (Schedule of the Parties).

Article 15.7. Notices of Intended Procurement

1. For each covered procurement, except in the circumstances described in Article 15.11 (Limited Tendering), a procuring entity shall publish a notice of intended procurement through the appropriate paper or electronic means listed in Section G of its Schedule to Annex 15A (Schedule of the Parties). The notice shall remain accessible to the public, until at least the expiration of the time period indicated in the notice.

2. For covered procurement, notices of intended procurement and, where applicable, notices of planned procurement shall be directly accessible by electronic means and free of charge for central government entities that are covered under Annex 15A (Schedule of the Parties), through a single point of access, as listed in Section G of its Schedule to Annex 15A (Schedule of the Parties).

3. Unless otherwise provided in this Chapter, each notice of intended procurement shall include:

(a) the name and address of the procuring entity and other information necessary to contact the procuring entity and obtain all relevant documents relating to the procurement;

(b) a description of the procurement, including the nature and the quantity of the goods or services to be procured, or the estimated quantity if the quantity is not known, and a description of any options;

(c) for recurring contracts, an estimate, if possible, of the timing of subsequent notices of intended procurement;

(d) the timeframe for delivery of goods or services or the duration of the contract;

(e) the procurement method that will be used and, if applicable, whether it will involve negotiation or electronic auction;

(f) if applicable, the address and any final date for the submission of requests for participation in the procurement;

(g) the address and the final date for the submission of tenders;

(h) the language or languages in which tenders or requests for participation may be submitted, if they may be submitted in a language other than an official language of the Party of the procuring entity;

(i) a list and a brief description of any conditions for participation of suppliers, including any requirements for specific documents or certifications to be provided by suppliers in connection therewith, unless those requirements are included in tender documentation that is made available to all interested suppliers at the same time as the notice of intended procurement; and

(j) if, pursuant to Article 15.9 (Qualification of Suppliers), a procuring entity intends to select a limited number of qualified suppliers to be invited to tender, the criteria that will be used to select them and, if applicable, any limitation on the number of suppliers that will be permitted to tender.

Notice of Planned Procurement

4. Procuring entities are encouraged to publish as early as possible in each fiscal year a notice regarding their future procurement plans (hereinafter referred to as “notice of planned procurement”), which should include the subject matter of the procurement and the planned date of publication of the notice of intended procurement.

Article 15.8. Conditions for Participation

1. A procuring entity shall limit any conditions for participation in a covered procurement to those that are essential to ensure that a supplier has the legal and financial capacities and the commercial and technical abilities to undertake the relevant procurement.

2. In establishing the conditions for participation, a procuring entity:

(a) shall not impose the condition that, in order for a supplier to participate in a procurement, the supplier has previously been awarded one or more contracts by a procuring entity of a given Party or that the supplier has prior work experience in the territory of that Party; and

(b) may require relevant prior experience if essential to meet the requirements of the procurement.

3. In assessing whether a supplier satisfies the conditions for participation, a procuring entity shall:

(a) evaluate the financial capacity, and the commercial and technical abilities of a supplier on the basis of that supplier’s business activities both inside and outside the territory of the Party of the procuring entity²; and

(b) base its evaluation solely on the conditions that the procuring entity has specified in advance in notices or tender documentation.

2 For greater certainty, it is the responsibility of the supplier to provide accurate information, and the procuring entity may reasonably rely on information provided to it by the supplier.

4. A Party, including its procuring entities, may, with supporting evidence as applicable, exclude a supplier on grounds such as:

(a) bankruptcy or insolvency;

(b) false declarations;

(c) significant or persistent deficiencies in the performance of any substantive requirement or obligation under a prior contract or contracts;

(d) final judgments in respect of serious crimes or other serious offences;

(e) professional misconduct or acts or omissions that adversely reflect on the commercial integrity of the supplier; or

(f) failure to pay taxes.

Article 15.9. Qualification of Suppliers

Registration Systems and Qualification Procedures

1. A Party, including its procuring entities, may maintain a supplier registration system under which interested suppliers are required to register and provide certain information and documentation.

2. Each Party shall ensure that:

(a) its procuring entities make efforts to minimise differences in their qualification procedures; and

(b) where its procuring entities maintain registration systems, the entities make efforts to minimise differences in their registration systems.

3. A Party, including its procuring entities, shall not:

(a) adopt or apply any registration system or qualification procedure with the purpose or the effect of creating unnecessary obstacles to the participation of suppliers of the other Party in its procurement; or

(b) use that registration system or qualification procedure to prevent or delay the inclusion of suppliers of the other Party on a list of suppliers or prevent those suppliers from being considered for a particular procurement.

4. If a Party or a procuring entity maintains a supplier registration system, it shall:

(a) ensure that interested suppliers have access to information on the registration system through electronic means and that interested suppliers may request registration at any time; and

(b) if a request by a supplier is made, inform the supplier within a reasonable period of time of the decision to grant or reject this request, and if rejected, on request provide an explanation.

Selective Tendering

5. If a procuring entity intends to use selective tendering, the procuring entity shall:

(a) include in the notice of intended procurement at least the information specified in paragraphs 3(a), 3(b), 3(e), 3(f), 3(i) and 3(j) of Article 15.7 (Notices of Intended Procurement) and invite suppliers to submit a request for participation; and

(b) provide, by the commencement of the time period for tendering, at least the information in paragraphs 3(c), 3(d), 3(g) and 3(h) of Article 15.7 (Notices of Intended Procurement) to the qualified suppliers, including whether or not it uses a multi-use list.

6. A procuring entity shall allow all qualified suppliers to participate in a particular procurement, unless the procuring entity states in the notice of intended procurement any limitation on the number of suppliers that will be permitted to tender and the criteria for selecting the limited number of suppliers.

7. If the tender documentation is not made publicly available from the date of publication of the notice referred to in paragraph 5, the procuring entity shall ensure that the tender documentation is made available at the same time to all the qualified suppliers selected in accordance with paragraph 6.

Multi-Use Lists

8. A Party, including its procuring entities, may establish or maintain a multi-use list provided that it publishes annually, or otherwise makes continuously available by electronic means in the appropriate medium listed in its Schedule to Annex 15A, a notice inviting interested suppliers to apply for inclusion on the list. The notice shall include:

(a) a description of the goods or services, or categories thereof, for which the list may be used;

(b) the conditions for participation to be satisfied by suppliers for inclusion on the list and the methods that the procuring entity or other government agency will use to verify a supplier's satisfaction of those conditions;

(c) the name and address of the procuring entity or other government agency and other information necessary to contact the procuring entity and to obtain all relevant documents relating to the list;

(d) the period of validity of the list and the means for its renewal or termination, or if the period of validity is not provided, an indication of the method by which notice will be given of the termination of use of the list;

(e) the deadline for submission of applications for inclusion on the list, if applicable; and

(f) an indication that the list may be used for procurement covered by this Chapter, unless that indication is publicly available through information published pursuant to paragraph 2 of Article 15.6 (Publication of Procurement Information).

9. A Party, including its procuring entities, that establishes or maintains a multi-use list, shall:

(a) allow suppliers to apply at any time for inclusion on the multi-use list; and

(b) include on the list, within a reasonable period of time, all suppliers that satisfy the conditions for participation set out in the notice referred to in paragraph 8.

10. Notwithstanding paragraph 8, where a multi-use list will be valid for three years or less, a procuring entity may publish the notice referred to in paragraph 8 only once, at the beginning of the period of validity of the list, provided that the notice:

(a) states the period of validity and that further notices will not be published; and

(b) is published by electronic means and is made available continuously during the period of its validity.

11. If a supplier that is not included on a multi-use list submits a request for participation in a procurement based on the multi-use list and submits all required documents, within the time period provided for in paragraph 2 of Article 15.15 (Time Periods), a procuring entity shall examine the request. The procuring entity shall not exclude the supplier from

consideration in respect of the procurement on the grounds that the entity has insufficient time to examine the request, unless, in exceptional cases, due to the complexity of the procurement, the procuring entity is not able to complete the examination of the request within the time period allowed for the submission of tenders.

Information on Procuring Entity Decisions

12. A procuring entity or other entity of a Party shall promptly inform any supplier that submits a request for participation in a procurement or application for inclusion on a multi-use list of the decision with respect to the request or application.

13. If a procuring entity or other entity of a Party rejects a supplier's request for participation in a procurement or application for inclusion on a multi-use list, ceases to recognise a supplier as qualified, or removes a supplier from a multi-use list, the entity shall promptly inform the supplier and, on request of the supplier, promptly provide the supplier with a written explanation of the reasons for its decision.

Article 15.10. Electronic Auctions

If a procuring entity intends to conduct a covered procurement using an electronic auction, it shall provide each participant, before commencing the electronic auction, with:

(a) the automatic evaluation method, including the mathematical formula, that is based on the evaluation criteria set out in the tender documentation and that will be used in the automatic ranking or re-ranking during the auction;

(b) where applicable, the results of any initial evaluation of the elements of its tender if the contract is to be awarded on the basis of the most advantageous tender; and

(c) any other relevant information relating to the conduct of the auction.

Article 15.11. Limited Tendering

1. Provided that it does not use this provision for the purpose of avoiding competition among suppliers, or protects domestic suppliers, or in a manner that discriminates against suppliers of the other Party a procuring entity may use limited tendering.

2. If a procuring entity uses limited tendering, it may choose not to apply Articles

15.7 (Notices of Intended Procurement) through 15.10 (Electronic Auctions), Article 15.12 (Negotiations), paragraphs 1 through 5 of Article 15.14 (Tender Documentation), Articles 15.15 (Time Periods), and 15.16 (Treatment of Tenders and Awarding of Contracts) only under any of the following circumstances:

(a) if in response to a prior notice, invitation to participate, or invitation to tender:

(i) no tenders were submitted or no suppliers requested participation;

(ii) no tenders were submitted that conform to the essential requirements in the tender documentation;

(iii) no suppliers satisfied the conditions for participation; or

(iv) the tenders submitted were collusive;

provided that the procuring entity does not substantially modify the essential requirements set out in the notices or tender documentation;

(b) if the good or service can be supplied only by a particular supplier and no reasonable alternative or substitute good or service exists for any of the following reasons:

(i) the requirement is for a work of art;

(ii) the protection of patents, copyrights or other exclusive rights; or

(iii) due to an absence of competition for technical reasons;

(c) for additional deliveries by the original supplier or its authorised agents, of goods or services that were not included in the initial procurement if a change of supplier for those additional goods or services:

(i) cannot be made for technical reasons such as requirements of interchangeability or interoperability with existing

equipment, software, services or installations procured under the initial procurement or due to conditions under original supplier warranties; and

(ii) would cause significant inconvenience or substantial duplication of costs for the procuring entity;

(d) for goods purchased on a commodity market or exchange;

(e) if a procuring entity procures a prototype or a first good or service that is intended for limited trial or that is developed at its request in the course of, and for, a particular contract for research, experiment, study or original development. Original development of a prototype or a first good or service may include limited production or supply in order to incorporate the results of field testing and to demonstrate that the prototype of the first good or service is suitable for production or supply in quantity to acceptable quality standards, but does not include quantity production or supply to establish commercial viability or to recover research and development costs. Subsequent procurements of these newly developed goods or services, however, shall be subject to this Chapter;

(f) for purchases made under exceptionally advantageous conditions that only arise in the very short term in the case of unusual disposals such as those arising from liquidation, bankruptcy or receivership, but not for routine purchases from regular suppliers;

(g) if a contract is awarded to a winner of a design contest provided that:

(i) the contest has been organised in a manner that is consistent with this Chapter; and

(ii) the contest is judged by an independent jury with a view to award a design contract to the winner; or

(h) in so far as is strictly necessary if, for reasons of extreme urgency brought about by events unforeseeable by the procuring entity, the good or service could not be obtained in time by means of open or selective tendering.

3. For each contract awarded in accordance with paragraph 2, a procuring entity shall prepare a report in writing, or maintain a record that includes the name of the procuring entity, the value and kind of good or service procured, and a statement that indicates the circumstances and conditions described in paragraph 2 that justified the use of limited tendering.

Article 15.12. Negotiations

1. A Party may provide for its procuring entities to conduct negotiations if:

(a) the procuring entity has indicated its intent to conduct negotiations in the notice of intended procurement required under paragraph 1 of Article 15.7 (Notices of Intended Procurement); or

(b) it appears from the evaluation that no tender is obviously the most advantageous in terms of the specific evaluation criteria set out in the notice of intended procurement or tender documentation.

(c) there is a need to clarify the terms and conditions; or

(d) all bids exceed the allocated prices provided for in the procuring entity's budget, provided the terms and conditions the procuring entity specified in the tender documentation are not materially changed.

2. A procuring entity shall:

(a) ensure that any elimination of suppliers participating in negotiations is carried out in accordance with the evaluation criteria set out in the notice of intended procurement or tender documentation; and

(b) when negotiations are concluded, provide a common deadline for the remaining participating suppliers to submit any new or revised tenders.

Article 15.13. Technical Specifications

1. A procuring entity shall not prepare, adopt or apply any technical specification or prescribe any conformity assessment procedure with the purpose or effect of creating an unnecessary obstacle to trade between the Parties.

2. In prescribing the technical specifications for the good or service being procured, a procuring entity shall, if appropriate:

(a) set out the technical specifications in terms of performance and functional requirements, rather than design or descriptive characteristics; and

(b) base the technical specifications on international standards, where such exist; otherwise, on national technical regulations, recognised national standards or building codes.

3. If design or descriptive characteristics are used in the technical specifications, a procuring entity should indicate, if appropriate, that it will consider tenders of equivalent goods or services that demonstrably fulfil the requirements of the procurement by including words such as “or equivalent” in the tender documentation.

4. A procuring entity shall not prescribe technical specifications that require or refer to a particular trademark or trade name, patent, copyright, design, type, specific origin, producer or supplier, unless there is no other sufficiently precise or intelligible way of describing the procurement requirements and provided that, in these cases, the procuring entity includes words such as “or equivalent” in the tender documentation.

5. A procuring entity shall not seek or accept, in a manner that would have the effect of precluding competition, advice that may be used in the preparation or adoption of any technical specification for a specific procurement from a person that may have a commercial interest in the procurement.

6. For greater certainty, a Party, including its procuring entities, may, in accordance with this Article, prepare, adopt or apply technical specifications to promote the conservation of natural resources or protect the environment.

7. For greater certainty, this Chapter is not intended to preclude a Party, or its procuring entities, from preparing, adopting or applying technical specifications required to protect sensitive government information, including specifications that may affect or limit the storage, hosting or processing of that information outside the territory of the Party.

Article 15.14. Tender Documentation

1. A procuring entity shall promptly make available to any interested supplier tender documentation that includes all information necessary to permit the supplier to prepare and submit a responsive tender. Unless already provided in the notice of intended procurement, that tender documentation shall include a complete description of:

(a) the procurement, including the nature, scope and, if known the quantity of the good or service to be procured or, if the quantity is not known, the estimated quantity and any requirements to be fulfilled, including any technical specifications, conformity assessment certification, plans, drawings or instructional materials;

(b) any conditions for participation, including any financial guarantees, information and documents that suppliers are required to submit;

(c) all criteria to be considered in the awarding of the contract, and the relative importance of those criteria;

(d) if the procuring entity will conduct the procurement by electronic means, any authentication and encryption requirements or other requirements related to the submission of information by electronic means;

(e) if the procuring entity will hold an electronic auction, the rules, including identification of the elements of the tender related to the evaluation criteria, on which the auction will be conducted;

(f) if there will be a public opening of tenders, the date, time and place for the opening and, if appropriate, the persons authorised to be present;

(f) any other terms or conditions relevant to the evaluation of tenders;

(g) any other terms or conditions, including terms of payment and any limitation on the means by which tenders may be submitted, such as whether on paper or by electronic means; and

(h) any date for the delivery of a good or the supply of a service.

2. In establishing any date for the delivery of a good or the supply of a service being procured, a procuring entity shall take into account factors such as the complexity of the procurement, the extent of subcontracting anticipated and the realistic time required for production, de-stocking and transport of goods from the point of supply or for supply of services.

3. The evaluation criteria set out in the notice of intended procurement or tender documentation may include, among others, price and other cost factors, quality, technical merit, environmental characteristics and terms of delivery.

4. A procuring entity shall promptly:

(a) make available tender documentation to ensure that interested suppliers have sufficient time to submit responsive tenders;

(b) provide, on request, the tender documentation to any interested supplier; and

(c) reply to any reasonable request for relevant information by an interested or participating supplier, provided that the information does not give that supplier an advantage over other suppliers.

Modifications

5. If, prior to the award of a contract, a procuring entity modifies the criteria or requirements set out in a notice of intended procurement or tender documentation provided to a participating supplier, or amends or reissues a notice or tender documentation, it shall transmit in writing all those modifications or the amended or re-issued notice or tender documentation:

(a) to all suppliers that are participating in the procurement at the time of the modification, amendment or re-issuance, if those suppliers are known to the procuring entity, and in all other cases, in the same manner as the original information was made available; and

(b) in adequate time to allow those suppliers to modify and re-submit their initial tenders, as appropriate.

Preliminary Market Research and Engagement

6. For greater certainty, a procuring entity may, prior to publication of a notice of intended procurement, conduct market research and engagement with suppliers with a view to informing and developing technical specifications and other tender documentation for a particular procurement or informing suppliers of its procurement plans and requirements. If suppliers participate in the market research or engagement, a procuring entity shall take appropriate steps to ensure that suppliers do not gain an unfair advantage over other interested suppliers.

Article 15.15. Time Periods

1. A procuring entity shall, consistent with its own reasonable needs, provide sufficient time for a supplier to prepare and submit a request for participation and a responsive tender, taking into account factors such as:

(a) the nature and complexity of the procurement;

(b) the extent of subcontracting anticipated; and

(c) whether tenders can be received by electronic means.

2. The time periods for procurement in each Party shall be in accordance with Section G of each Party's Schedule set out in Annex 15A (Schedule of the Parties).

Article 15.16. Treatment of Tenders and Awarding of Contracts

Treatment of Tenders

1. A procuring entity shall receive, open and treat all tenders under procedures that guarantee the fairness and impartiality of the procurement process and the confidentiality of tenders.

2. A procuring entity shall not penalise any supplier whose tender is received after the time specified for receiving tenders if the delay is due solely to mishandling on the part of the procuring entity.

3. If a procuring entity provides a supplier with an opportunity to correct unintentional errors of form between the opening of tenders and the awarding of the contract, the procuring entity shall provide the same opportunity to all participating suppliers.

Awarding of Contracts

4. To be considered for an award, a tender shall be submitted in writing and shall, at the time of opening, comply with the essential requirements set out in the notice and tender documentation and be submitted by a supplier who satisfies the conditions for participation.

5. Unless a procuring entity determines that it is not in the public interest to award a contract, it shall award the contract to the supplier that the procuring entity has determined to be fully capable of fulfilling the terms of the contract and that, based solely on the evaluation criteria specified in the notice and tender documentation, has submitted:

(a) the most advantageous tender; or

(b) if price is the sole criterion, the lowest price.

6. If a procuring entity receives a tender with a price that is abnormally lower than the prices in other tenders submitted, it may verify with the supplier that it satisfies the conditions for participation and is capable of fulfilling the terms of the contract.

7. A procuring entity shall not use options, cancel a covered procurement, or modify or terminate awarded contracts in a manner that circumvents the obligations of this Chapter.

Article 15.17. Transparency and Post-Award Information

Information Provided to Suppliers

1. A procuring entity shall promptly inform participating suppliers of the contract award decision and, on the request of a supplier, shall do so in writing. Subject to paragraphs 2 and 3 of Article 15.18 (Disclosure of Information), a procuring entity shall, on request, provide an unsuccessful supplier with an explanation of the reasons why the entity did not select its tender and the relative advantages of the successful supplier's tender.

Publication of Award Information

2. No later than 72 days after the award of each contract covered by this Chapter, a procuring entity shall, in accordance with its regulations and procedures, publish a notice in an appropriate electronic medium listed in Annex 15A (Schedule of the Parties) and the information shall remain readily accessible for a reasonable period of time. The notice shall endeavour to include the following information to the extent which the capacity of the procuring entity allows:

(a) a description of the good or service procured;

(b) the name and address of the procuring entity;

(c) the name and address of the successful supplier;

(d) the value of the successful tender or the highest and lowest offers taken into account in the award of the contract;

(e) the date of award; and

(f) the procurement method used, and in cases where limited tendering was used in accordance with Article 15.11 (Limited Tendering), a description of the circumstances justifying the use of limited tendering.

3. The Parties shall review the operation of paragraph 2 two years after the date of entry into force of this Agreement, and as may be agreed thereafter by the Parties.

Maintenance of Documentation, Reports and Electronic Traceability

4. Each procuring entity shall, for a period of at least three years from the date it awards a contract, maintain:

(a) the documentation and reports of tendering procedures and contract awards relating to covered procurement, including the reports required under Article 15.11 (Limited Tendering); and

(b) data that ensure the appropriate traceability of the conduct of covered procurement by electronic means.

Article 15.18. Disclosure of Information

Provision of Information to Parties

1. On request of the other Party, a Party shall promptly provide any information necessary to determine whether a procurement was conducted fairly, impartially and in accordance with this Chapter, including information on the characteristics and relative advantages of the successful tender. In cases where release of the information would prejudice competition in future tenders, the Party that receives the information shall not disclose it to any supplier, except after consulting with, and obtaining the agreement of the Party that provided the information.

Non-Disclosure of Information

2. Notwithstanding any other provision of this Chapter, a Party, including its procuring entities, shall not, except to the extent required by law or with the written authorisation of the supplier that provided the information, disclose information that would prejudice a legitimate commercial interest of a particular supplier or that might prejudice fair competition

between suppliers.

3. Nothing in this Chapter shall be construed to require a Party, including its procuring entities, authorities and review bodies, to disclose confidential information if that disclosure:

(a) would impede law enforcement;

(b) might prejudice fair competition between suppliers;

(c) would prejudice the legitimate commercial interests of particular persons, including the protection of intellectual property; or

(d) would otherwise be contrary to the public interest.

Article 15.19. Environmental, Social and Labour Considerations

A Party, including its procuring entities, may:

(a) take into account environmental, social and labour considerations throughout the procurement procedure, provided they are:

(i) based on objectively verifiable criteria;

(ii) non-discriminatory; and

(iii) indicated in the notice of intended procurement or tender documentation; and

(b) take appropriate measures to ensure compliance with its obligations in the fields of environmental, social and labour law, provided they are non-discriminatory.

Article 15.20. Ensuring Integrity In Procurement Practices

1. Each Party shall ensure that criminal or administrative measures exist to address corruption, fraud, and other illegal acts in its government procurement.

2. These measures may include procedures to render ineligible for, or exclude from, participation in the Party's procurements, either indefinitely or for a stated period of time, suppliers that the Party has determined to have engaged in corrupt, fraudulent or other illegal acts in relation to government procurement in the Party's territory. When applying those procedures, each Party, including its procuring entities:

(a) may consider the gravity of the supplier's acts or omissions, and any remedial measures or mitigating factors; and

(b) shall treat a supplier of the other Party with due process, in accordance with its government procurement policies and frameworks.

3. Each Party shall also ensure that it has policies and procedures in place to eliminate, to the extent possible, or manage any potential conflict of interest on the part of those engaged in or having influence over a procurement.

4. Each Party may put in place policies or procedures that require successful suppliers to maintain and enforce appropriate measures, such as internal controls, business ethics, and compliance programmes, for preventing and detecting corruption, fraud, and other illegal acts, provided they are non-discriminatory.

Article 15.21. Domestic Review

1. Each Party shall maintain, establish or designate at least one impartial administrative or judicial authority (hereinafter referred to as a "review authority") that is independent of its procuring entities to review, in a non-discriminatory, timely, transparent and effective manner, a challenge or complaint (hereinafter referred to as a "complaint") by a supplier that there has been:

(a) a breach of this Chapter; or

2. In the event of a complaint by a supplier arising in the context of covered procurement in which the supplier has, or had, an interest that there has been a breach or a failure as referred to in paragraph 1, the Party of the procuring entity conducting the procurement shall encourage the procuring entity and the supplier to seek resolution of the complaint through consultations. The procuring entity shall accord impartial and timely consideration to the complaint in a manner that is not prejudicial to the supplier's participation in ongoing or future procurement or to its right to seek corrective measures under the administrative or judicial review procedure. Each Party shall make information on its complaint mechanisms generally available.

3. Each supplier shall be allowed a sufficient period of time to prepare and submit a complaint from when the basis of the complaint became known or reasonably should have become known to the supplier.

(b) a supplier that initiates a complaint shall be provided an opportunity to reply to the procuring entity's response before the review authority takes a decision on the complaint;

(c) the participants shall have the right to be represented and accompanied;

(d) the participants shall have access to all proceedings;

(e) the participants shall have the right to request that the proceedings take place in public and that witnesses may be presented; and

(f) the review authority shall provide its decisions or recommendations on a supplier's complaint in a timely manner, in writing, with an explanation of the basis for each decision or recommendation.

7. Each Party shall adopt or maintain procedures that provide for:

(a) prompt interim measures pending the resolution of a complaint to preserve the supplier's opportunity to participate in the procurement and to ensure that the procuring entities of the Party comply with its measures implementing this Chapter; and

(b) corrective action that may include compensation under paragraph 5.

The procedures may provide that overriding adverse consequences for the interests concerned, including the public interest, may be taken into account when deciding whether those measures should be applied. Just cause for not acting shall be provided in writing.

4. If a Party objects to a proposed modification, including a modification regarding a procuring entity on the basis that government control or influence over the entity's covered procurement has been effectively eliminated, that Party may request additional information, including information on the nature of any government control or influence, with a view to clarifying and reaching agreement on the proposed modification, including the procuring entity's continued coverage under this Chapter. The modifying Party and the objecting Party shall make every attempt to resolve the objection through consultations. 2. In this regard, the Parties acknowledge that inadequate fisheries management, fisheries subsidies that contribute to overfishing and overcapacity, and illegal, unreported, and unregulated (“IUU”) fishing (2) can have significant negative impacts on trade, development and the environment, and recognise the need for individual and collective action to address the problems of overfishing and unsustainable utilisation of fisheries resources.

3. The Parties shall endeavour to operate a fisheries management system, including among others those with a national or regional focus, that regulates marine wild capture fishing that is designed to:

(a) prevent overfishing and overcapacity;

1. If the responding Party makes a notification that a reasonable period of time is required pursuant to paragraph 3(c) of Article 25.19 (Compliance with the Final Report), it shall, if possible, be mutually agreed by the Parties. If the Parties are unable to agree on the length of the reasonable period of time, either Party may, no later than 20 days after the date of receipt of the notification made by the responding Party in accordance with paragraph 3 of Article 25.19 (Compliance with the Final Report) request the panel, in writing, to determine the length of the reasonable period of time. be notified simultaneously to the other Party. The 20-day period referred to in this paragraph may be extended by mutual agreement of the Parties.

2. The panel shall deliver its decision, including its reasons for the decision, to the Parties within 45 days from the relevant request.

3. The length of the reasonable period of time for compliance with the final report may be extended by mutual agreement of the Parties. As a guideline, the reasonable period of time, if determined by the panel, should not exceed 15 months from the date of the issuance of the panel's final report to the Parties. However, such reasonable period of time may be shorter or longer, depending upon the particular circumstances.

4. If the responding Party considers that it has complied with the final report, it shall, no later than the date of the expiry of the reasonable period of time, provide the complaining Party with a description of the steps that it has taken to comply with the final panel report.

2. If the Parties disagree on the existence of measures to comply with the final report, or their consistency with this Agreement, a Party may request, in writing, for the panel to decide the matter.

3. A request made pursuant to paragraph 2 may only be made after the earlier of either:

(a) the expiry of the reasonable period of time established in accordance with Article 25.20 (Reasonable Period of Time for Compliance); or

(b) a notification by the responding Party, pursuant to paragraph 4 of Article

25.20 (Reasonable Period of Time for Compliance), that it has complied with the final report.

4. The request referred to in paragraph 2 shall provide the factual and legal basis for the complaint, sufficient to present the problem clearly, including the specific provisions of this Agreement at issue.

8. The panel reconvened pursuant to paragraph 5 shall, if possible, provide its interim report to the Parties within 60 days of the date it reconvenes, and its final report 15 days thereafter. If the panel considers it cannot provide either report within these time periods, it shall promptly inform the Parties in writing of the reasons for the delay together with an estimate of when it will issue its report. The panel shall not exceed an additional period of 30 days and, in cases of urgency, shall make every effort to not exceed 15 days.

9. The panel shall accord adequate opportunity to the Parties to submit written comments on the interim compliance report. After considering any written comments by the Parties on the interim compliance report, the panel may modify its compliance report and make any further examination it considers appropriate. The panel shall include a discussion in its

final compliance report of any comments made by the Parties on the interim compliance report.

Article 25.22. Temporary Remedies In the Event of Non-Compliance

1. Compensation and the suspension of concessions or other obligations are temporary measures available in the event that the responding Party does not comply with the findings of the panel, and shall only be applied until the inconsistency of the measure with the relevant provisions has been removed or a mutually agreed solution pursuant to Article 25.27 (Mutually Agreed Solution) is reached. However, neither compensation nor the suspension of concessions or other obligations is preferred to full compliance with the findings of the panel. Compensation is voluntary and, if granted, shall be consistent with this Agreement.

2. The responding Party shall, if requested by the complaining Party, enter into negotiations with a view to agreeing mutually acceptable compensation if:

(a) the responding Party has notified the complaining Party that it will not comply with the final report; or

(b) the panel finds, pursuant to Article 25.21 (Compliance Review), that the responding Party has failed to comply with the final panel report.

3. If the Parties fail to reach a mutually acceptable agreement on compensation within 30 days after the date of receipt of the request made in accordance with paragraph 2, or the Parties have agreed on compensation but the complaining Party considers that the responding Party has failed to observe the terms of the mutually acceptable agreement on compensation, the complaining Party may deliver a written notification to the responding Party that it intends to suspend the application of concessions or other obligations under this Agreement.

4. A notification made under paragraph 3 shall specify:

(a) the level of concessions or other obligations that the complaining Party proposes to suspend; and

(b) the relevant sectors to which the concessions or other obligations relate.

5. The complaining Party shall have the right to implement the suspension of concessions or other obligations referred to in paragraph 3 20 days after the date of receipt of the notification by the responding Party, unless the responding Party made a request under paragraph 9

6. The suspension of concessions or other obligations shall not exceed a level equivalent to the nullification or impairment, and shall be restricted to benefits accruing to the respondent Party under this Agreement.

7. In considering what concessions or other obligations to suspend in accordance with paragraph 3, the complaining Party shall apply the following principles:

(a) the complaining Party should first seek to suspend the concessions or other obligations in the same sector or sectors as that affected by the measure that the panel has found to be inconsistent with this Agreement; and

(b) the complaining Party may suspend concessions or other obligations in other sectors, if it considers that it is not practicable or effective to suspend concessions or other obligations in the same sectors.

8. The right to suspend concessions or other obligations arising under paragraph 3 shall not be exercised if:

(a) a review is being undertaken pursuant to paragraphs 9 and 10; or

(b) the Parties have decided, pursuant to a mutually agreed solution reached in accordance with Article 25.27 (Mutually Agreed Solution), that the complaining Party shall not exercise its right to suspend concessions or other obligations pursuant to paragraph 3.

9. No later than 30 days after receipt of the notification referred to in paragraph 3, the responding Party may request in writing that the panel reconvene to make findings on the matter if the responding Party:

(a) objects to the proposed level of suspension of concessions or other obligations on the basis that it exceeds a level equivalent to the level of nullification or impairment;

(b) considers that it has complied with the terms and conditions of any compensation agreed pursuant to paragraph 2; or

(c) claims that the complaining Party has failed to follow the principles set out in paragraph 5.

10. If a panel is requested to reconvene pursuant to paragraph 9, it shall reconvene within 15 days of receipt of the request. The panel shall present its findings to the Parties no later than 90 days after the receipt of the request. If the panel considers that it cannot present its findings within this time period, it shall inform the Parties in writing of the reasons for the delay, together with an estimate of when it will present its findings.
