HAVE AGREED AS FOLLOWS:

Part One. GENERAL PROVISIONS OF ACP-EEC COOPERATION

Chapter 1. Objectives and Principles of Cooperation

Article 1.

The Community and its Member States, of the one part, and the ACP States, of the other part (hereinafter referred to as the "Contracting Parties"), hereby conclude this cooperation Convention in order to promote and expedite the economic, cultural and social development, of the ACP States and to consolidate and diversify their relations in a spirit of solidarity and mutual interest.

The Contracting Parties thereby affirm their undertaking to continue, strengthen and render more effective the system of cooperation established under the first, second and third ACP-EEC Conventions and confirm the special character of their relations, based on their reciprocal interest, and the specific nature of their cooperation.

The Contracting Parties hereby express their resolve to intensify their effort to create, with a view to a more just and balanced international economic order, a model for relations between developed and developing states and to work together to affirm in the international context the principles underlying their cooperation.

Article 2.

ACP-EEC cooperation, underpinned by a legally binding system and the existence of joint institutions, shall be exercised on the basis of the following fundamental principles:

- equality between partners, respect for their sovereignty, mutual interest and interdependence,
- the right of each State to determine its own political, social, cultural and economic policy options,
- security of their relations based on the *acquis* of their system of cooperation.

Article 3.

The ACP States shall determine the development principles, strategies and models for their economies and societies in all sovereignty.

Article 4.

Support shall be provided in ACP-EEC cooperation for the ACP States' efforts to achieve comprehensive self-reliant and self-sustained development based on their cultural and social values, their human capacities, their natural resources and their economic potential in order to promote the ACP States' social, cultural and economic progress and the well-being of their populations through the satisfaction of their basic needs, the recognition of the role of women and the enhancement of people's capacities, with respect for their dignity.

Such development shall be based on a sustainable balance between its economic objectives, the rational management of the environment and the enhancement of natural and human resources.

Article 5.

1. Cooperation shall be directed towards development centred on man, the main protagonist and beneficiary of development, which thus entails respect for and promotion of all human rights. Cooperation operations shall thus be conceived in accordance with the positive approach, where respect for human rights is recognized as a basic factor of real development and where cooperation is conceived as a contribution to the promotion of these rights.

In this context development policy and cooperation are closely linked with the respect for and enjoyment of fundamental human rights. The role and potential of initiatives taken by individuals and groups shall also be recognized and fostered in order to achieve in practice real participation of the population in the development process in accordance with Article 13.

2. Hence the Parties reiterate their deep attachment to human dignity and human rights, which are legitimate aspirations of individuals and peoples. The rights in question are all human rights, the various categories thereof being indivisible and

inter-related, each having its own legitimacy; non-discriminatory treatment; fundamental human rights; civil and political rights; economic, social and cultural rights.

Every individual shall have the right, in his own country or in a host country, to respect for his dignity and protection by the law.

ACP-EEC cooperation shall help abolish the obstacles preventing individuals and peoples from actually enjoying to the full their economic, social and cultural rights and this must be achieved through the development which is essential to their dignity, their well-being and their self-fulfilment. To this end, the Parties shall strive, jointly or each in its own sphere of responsibility, to help eliminate the causes of situations of misery unworthy of the human condition and of deep-rooted economic and social inequalities.

The Contracting Parties hereby reaffirm their existing obligations and commitment in international law to strive to eliminate all forms of discrimination based on ethnic group, origin, race, nationality, colour, sex, language, religion or any other situation. This commitment applies more particularly to any situation in the ACP States or in the Community that may adversely affect the pursuit of the objectives of the Convention, and to the system of apartheid, having regard also to its destabilizing effects on the outside. The Member States (and/or, where appropriate, the Community itself) and the ACP States will continue to ensure, through the legal or administrative measures which they have or will have adopted, that migrant workers, students and other foreign nationals legally within their territory are not subjected to discrimination on the basis of racial, religious, cultural or social differences, notably in respect of housing, education, health care, other social services and employment.

3. At the request of the ACP States, financial resources may be allocated, in accordance with the rules governing development finance cooperation, to the promotion of human rights in the ACP States through specific schemes, public or private, that would be decided, particularly in the legal sphere, in consultation with bodies of internationally recognized competence in the field. Resources may also be given to support the establishment of structures to promote human rights. Priority shall be given to schemes of regional scope.

Article 6.

1. With a view to attaining more balanced and self-reliant economic development in the ACP States, special efforts shall be made under this Convention to promote rural development, food security for the people, rational management of natural resources, and the preservation, revival and strengthening of agricultural production potential in the ACP States.

2. The Contracting Parties recognize that priority must be given to environmental protection and the conservation of natural resources, which are essential conditions for sustainable and balanced development from both the economic and human viewpoints.

Article 7.

The Community and the ACP States shall give special importance and high priority to regional cooperation and integration. In this context, the Convention shall offer effective support for the ACP States' efforts to organize themselves into regional groupings and to step up their cooperation at regional and inter-regional level with a view to promoting a new, more just and more balanced economic order.

Article 8.

The Contracting Parties acknowledge the need to accord special treatment to the least-developed ACP States and to take account of the specific difficulties confronting the landlocked and island ACP States. They shall pay special attention to improving the living conditions of the poorest sections of the population.

Cooperation shall comprise, inter alia, special treatment when determining the volume of financial resources and the conditions attached thereto in order to enable the least-developed ACP States to overcome structural and other obstacles to their development.

For the landlocked and island ACP States, cooperation shall be aimed at devising and encouraging specific operations to deal with development problems caused by their geographical situations.

Article 9.

In order to step up the effectiveness of the instruments of this Convention, the Contracting Parties shall adopt, in the

framework of their respective responsibilities, guidelines, priorities and measures conducive to attaining the objectives set out in this Convention and agree to pursue, in accordance with the principles set out in Article 2, the dialogue within joint institutions and in the coordinated implementation of development finance cooperation and the other cooperation instruments.

Article 10.

The Contracting Parties shall, each as far as it is concerned in the framework of this Convention, take all appropriate measures, whether general or particular, to ensure the fulfilment of the obligations arising from this Convention and to facilitate the pursuit of its objectives. They shall refrain from any measures liable to jeopardize the attainment of the objectives of this Convention.

Article 11.

Within the scope of their respective responsibilities, the institutions of this Convention shall examine periodically the results of the application thereof, provide any necessary impetus and take any relevant decision or measure for the attainment of its objectives.

Any question that might directly hamper the effective attainment of the objectives of this Convention may be raised in the context of the institutions.

Consultations shall take place within the Council of Ministers at the request of either Contracting Party in cases provided for in this Convention or where difficulties arise with the application or interpretation thereof.

Article 12.

Where the Community intends, in the exercise of its powers, to take a measure which might affect the interests of the ACP States as far as this Convention's objectives are concerned, it shall inform in good time the said States of its intentions. Towards this end, the Commission shall communicate regularly to the Secretariat of the ACP States any proposals for such measures. Where necessary, a request for information may also take place on the initiative of the ACP States.

At their request, consultations shall be held in good time so that account may be taken of their concerns as to the impact of those measures before any final decision is made.

After such consultations have taken place, the ACP States shall also be provided with adequate information on the entry into force of such decisions, in advance whenever possible.

Chapter 2. Objectives and Guidelines of the Convention In the Main Areas of Cooperation

Article 13.

Cooperation shall be aimed at supporting development in the ACP States, a process centred on man himself and rooted in each people's culture. It shall back up the policies and measures adopted by those States to enhance their human resources, increase their own creative capacities and promote their cultural identities. Cooperation shall also encourage participation by the population in the design and execution of development operations.

Account shall be taken, in the various fields of cooperation, and at all the different stages of the operations executed, of the cultural dimension and social implications of such operations and of the need for both men and women to participate and benefit on equal terms.

Article 14.

Cooperation shall entail mutual responsibility for preservation of the natural heritage. In particular, it shall attach special importance to environmental protection and the preservation and restoration of natural equilibria in the ACP States. Cooperation schemes in all areas shall therefore be designed to make the objectives of economic growth compatible with development that respects natural equilibria and brings about lasting results in the service of man.

In the framework of efforts to protect the environment and restore natural balances, cooperation shall help promote specific operations concerning the conservation of natural resources, renewable and non-renewable, the protection of

ecosystems and the control of drought, desertification and deforestation; other operations on specific themes shall also be undertaken (notably locust control, the protection and utilization of water resources, the preservation of tropical forests and biological diversity, the promotion of a better balance between urban and rural areas, and the urban environment).

Article 15.

Agricultural cooperation shall be aimed at the pursuit of food self-sufficiency and food security in the ACP States, developing and organizing their productive systems, improving the living standards and conditions and the life-styles of the rural population and achieving the balanced development of rural areas.

Operations in this field shall be designed and executed to support the agricultural and food policies or strategies adopted by the ACP States.

Article 16.

Cooperation in the field of mining and energy shall be directed at promoting and expediting, in the mutual interest, diversified economic development, deriving full benefit from the ACP States' human potential: and natural resources, and at fostering better integration of these and other sectors and their complementarity with the rest of the economy.

Cooperation shall be aimed at creating and consolidating the cultural, social and economic environment and the infrastructure required to achieve that objective.

Support shall be provided for the ACP States' efforts to devise and implement energy: policies suited to their situation, notably the gradual reduction of the dependence of the majority of them on imported petroleum products and the development of new and renewable sources of energy.

Cooperation shall be aimed at encouraging improved exploitation of energy and mining resources by taking account of the energy component in the development of the different economic and social sectors and thus helping to improve living conditions and the environment, leading to the better conservation of biomass resources, particularly fuelwood.

Article 17.

The Community and the ACP States acknowledge that industrialization is a driving force complementary to agricultural and rural development in promoting the economic transformation of the ACP States in order to achieve self-sustained growth and balanced and diversified development. Industrial development is needed to enhance the productivity of the ACP economies so that they can meet basic human needs and step up the competitive participation of the ACP States in world trade by way of selling more value-added products.

Article 18.

Given the extreme dependence of the economies of the vast majority of ACP States on their export of commodities, the Contracting Parties agree to pay particular attention to their cooperation in this sector with a view to supporting ACP States' policies or strategies designed:

- on the one hand, to foster diversification, both horizontal and vertical, of the ACP economies, in particular through the development of processing, marketing, distribution and transport (PMD), and
- on the other hand, to improve the competitiveness of the ACP States' commodities on world markets through the reorganization and rationalization of their production, marketing and distribution activities.

Article 19.

The aim of cooperation in fisheries shall be to help the ACP States to develop their fishery resources in order to expand production for domestic consumption as part of their efforts to achieve increased food security and increase production for export. Such cooperation shall be designed to serve the mutual interests of the Parties, in accordance with their fishery policies.

Chapter 3. Widening Participation In Cooperation Activities

Article 20.

In accordance with Articles 2, 3 and 13 and in order to encourage all parties from the ACP States and the Community which are in a position to contribute to the autonomous development of the ACP States to put forward and implement initiatives, cooperation shall also support, within limits laid down by the ACP States concerned, development operations put forward by economic, social and cultural organizations in the framework of decentralized cooperation, in particular where they combine the efforts and resources of organizations from the ACP States and their counterparts from the Community. This form of cooperation shall be aimed in particular at making the capabilities, original operating methods and resources of such parties available to the development of the ACP States.

The parties referred to in this Article are decentralized public authorities, rural and village groupings, cooperatives, firms, trade unions, teaching and research centres, non-governmental development organizations, various associations and all groups and parties which are able and wish to make their own spontaneous and original contribution to the development of ACP States.

Article 21.

Cooperation shall encourage and support the initiatives of the ACP parties referred to in Article 20, provided they correspond with the priorities, guidelines and development methods adopted by the ACP States. In this framework, cooperation shall support either the independent activities of ACP parties or the activities of ACP parties which are combined with support from similar parties from the Community which make their capabilities, experience, technological and organizational capacities or financial resources available to them.

Cooperation shall encourage parties from the ACP States and the Community to provide supplementary financial and technical resources for the development effort. Cooperation may provide decentralized cooperation operations with financial and/or technical support drawn from the resources of the Convention under the conditions laid down in Article 22.

This form of cooperation shall be organized in accordance with the role and the prerogatives of the public authorities of the ACP States.

Article 22.

Decentralized cooperation operations may be supported through the instruments of development finance cooperation, with the approval of the ACP States concerned, preferably from the programming stage, of the principle of and the conditions for providing support for this form of cooperation. Such support shall be provided, to the extent to which it is necessary for the successful implementation of the proposed operations provided the usefulness of the latter has been recognized and in accordance with the provisions for development finance cooperation. Projects under this form of cooperation may be linked, or not, with programmes in the concentration sectors of the indicative programmes with a priority for those linked to the concentration sectors.

Chapter 4. Principles Governing the Instruments of Cooperation

Article 23.

In order to contribute towards achieving the aims of this Convention, the Contracting Parties shall deploy cooperation instruments that correspond to the principles of solidarity and mutual interest, adapted to the economic, cultural and social situation in the ACP States and in the Community and to developments in their international environment.

These instruments shall be directed mainly, by strengthening the established mechanisms and systems, at:

- increasing trade between the Parties,
- supporting the ACP States' efforts to achieve self-reliant development by stepping up their capacity to innovate and to adapt and transform technology,
- supporting the ACP States' structural adjustment efforts and thus contributing to the attenuation of the debt burden,
- helping the ACP States to gain access to the capital markets and encouraging direct private European investment to contribute towards the development of the ACP States,
- remedying the instability of export earnings from the ACP States' agricultural commodities and helping those countries to cope with serious disruptions affecting their mining industries.

Article 24.

In order to promote and diversify trade between the Contracting Parties, the Community and the ACP States are agreed on:

- general trade provisions,
- special arrangements for Community import of certain ACP products,
- arrangements to promote the development of the ACP States' trade and services, including tourism,
- a system of reciprocal information and consultation designed to help apply the trade cooperation provisions of this Convention effectively.

Article 25.

The aim of the general trade arrangements, which are based on the Contracting Parties' international obligations, shall be to provide a firm and solid foundation for trade cooperation between the ACP States and the Community.

They shall be based on the principle of free access to the Community market for products originating in the ACP States, with special provisions for agricultural products and a safeguard clause.

In view of the ACP States' present development needs, the arrangements shall not comprise any element of reciprocity for those States as regards free access.

They shall also be based on the principle of non-discrimination by the ACP States between the Member States and the according to the Community of treatment no less favourable than the most-favoured-nation treatment.

Article 26.

The Community shall contribute towards the ACP States' own development efforts by providing adequate financial resources and appropriate technical assistance aimed at stepping up those States' capacities for self-reliant and integrated economic, social and cultural development and also at helping to raise their populations' standard of living and well-being, and promote and mobilize resources in support of sustainable, effective and growth-oriented structural adjustment programmes.

Such contributions shall be made on a more predictable and continuous basis. They shall be provided at very highly concessional terms. Particular account shall be taken of the situation of the least-developed ACP States.

Article 27.

The Contracting Parties agree to facilitate greater, more stable flows of resources from the private sector to the ACP States by taking measures to improve the access of ACP States to capital markets and to encourage European private investment in ACP States.

The Contracting Parties underline the need to promote, protect, finance and support investment and to provide equitable and stable conditions for the treatment of such investment.

Article 28.

The Contracting Parties agree to confirm the importance of the system for the stabilization of export earnings, as well as of intensifying the process of consultation between the ACP States and the Community in international fora and organizations which aim to stabilize agricultural commodity markets.

Given the role played by the mining industry in the development efforts of numerous ACP States and the ACP-EEC mutual dependence in that sector, the Contracting Parties confirm the importance of the system established to help ACP States confronted with serious disruptions in that sector to restore it to a viable state and remedy the consequences of such disruptions for their development.

Part Two. THE AREAS OF ACP-EEC COOPERATION

Title I. ENVIRONMENT

Article 33.

In the framework of this Convention, the protection and the enhancement of the environment and natural resources, the halting of the deterioration of land and forests, the restoration of ecological balances, the preservation of natural resources and their rational exploitation are basic objectives that the ACP States concerned shall strive to achieve with Community support with a view to bringing an immediate improvement in the living conditions of their populations and to safeguarding those of future generations.

Article 34.

The ACP States and the Community recognize that the existence of some ACP States is under threat as a result of a rapid deterioration of the environment that hinders any development efforts, in particular those aimed at achieving the priority objectives of food self-sufficiency and food security.

For many ACP States efforts to halt this deterioration of the environment and conserve natural resources are imperative and call for the preparation and implementation of coherent modes of development that have due regard for ecological balances.

Article 35.

The dimension of the environmental problem and of the means to be deployed mean that operations will have to be carried out in the context of overall, long-term policies, drawn up and implemented by the ACP States at national, regional and international level with international support.

To this end, the Parties agree to give priority in their activities to:

- preventive approach aimed at avoiding harmful effects on the environment as a result of any programme or operation,
- a systematic approach that will ensure ecological viability at all stages, from identification to implementation,
- a trans-sectoral approach that takes into account not only the direct but also the indirect consequences of the operations undertaken.

Article 36.

The protection of the environment and natural resources requires a comprehensive approach embracing the social and cultural dimensions.

In order to ensure that this specific dimension shall be taken into account, attention shall be given to incorporating suitable educational, training, information and research schemes in projects and programmes.

Article 37.

Cooperation instruments appropriate to environmental needs shall be designed and implemented.

Where necessary, both qualitative and quantitative criteria may be used. Jointly approved check-lists shall be used to help estimate the environmental viability of proposed operations, whatever their scale. Environmental impact assessment will be carried out as appropriate in the case of large-scale projects and those posing a significant threat to the environment.

For the proper integration of environmental considerations, physical inventories, where possible translated into accounting terms, shall be drawn up.

The implementation of these instruments has to ensure that, should an adverse environmental impact be foreseen, the necessary corrective measures are formulated in the early stage of the preparation of the proposed project or programme so that it can go ahead in accordance with the planned timetable though improved in terms of environmental and natural

resource protection.

Article 38.

The Parties, desirous of bringing real protection and effective management to the environment and natural resources, consider that the areas of ACP-EEC cooperation covered in Part Two of this Convention shall be systematically examined and appraised in this light.

In this spirit the Community shall support efforts made by the ACP States at national, regional and international level and also operations mounted by intergovernmental and non-governmental organizations in furtherance of national and intergovernmental policies and priorities.

Article 39.

1. The Contracting Parties undertake, for their part, to make every effort to ensure that international movements of hazardous waste and radioactive waste are generally controlled, and they emphasize the importance of efficient international cooperation in this area.

With this in view, the Community shall prohibit all direct or indirect export of such waste to the ACP States while at the same time the ACP States shall prohibit the direct or indirect import into their territory of such waste from the Community or from any other country, without prejudice to specific international undertakings to which the Contracting Parties have subscribed or may subscribe in the future in these two areas within the competent international fora.

These provisions do not prevent a Member State to which an ACP State has chosen to export waste for processing from returning the processed waste to the ACP State of origin.

The Contracting Parties shall expedite adoption of the necessary internal legislation and administrative regulations to implement this undertaking. At the request of one of the Parties, consultations may be held if delays are encountered. At the conclusion of such consultations each Party may take appropriate steps in the light of the situation.

2. The Parties undertake to monitor strictly the implementation of the prohibition measures referred to in the second paragraph of paragraph 1. Should difficulties arise in this respect, consultations may be held subject to the same conditions as those provided for in the second paragraph of paragraph 1 and with the same effect.

3. The term "hazardous waste" within the meaning of this Article shall cover categories of products listed in Annexes 1 and 2 to the Basle Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal.

As regards radioactive waste, the applicable definitions and thresholds shall be those which will be laid down in the framework of the IAEA. In the meantime, the said definitions and thresholds shall be those specified in the declaration in Annex VIII to this Convention.

Article 40.

At the request of the ACP States, the Community shall provide available technical information on pesticides and other chemical products with a view to helping them develop or reinforce a suitable and safe use of these products.

Where necessary and in accordance with the provisions for development finance cooperation, technical assistance can be given in order to ensure conditions of safety at all stages, from production to disposal of such products.

Article 41.

The Parties recognize the value of exchanging views, using existing consultation mechanisms under this Convention, on major ecological hazards, whether on a planetary scale (such as the greenhouse effect, the deterioration of the ozone layer, tropical forests, etc.), or of a more specific scope resulting from the application of industrial technology. Such consultations may be requested by either Party, insofar as these hazards may in practice affect the Contracting Parties, and will be aimed at assessing the scope for joint action to be undertaken within the terms of this Convention. If necessary, the consultations will also provide for an exchange of views prior to discussions conducted on these subjects in the appropriate international fora.

Title II. AGRICULTURAL COOPERATION, FOOD SECURITY AND RURAL DEVELOPMENT

Chapter 1. Agricultural Cooperation and Food Security

Article 42.

Cooperation in the agricultural and rural sector, that is arable farming, livestock production, fisheries and forestry, shall be aimed, inter alia, at:

- continuously and systematically promoting viable and sustainable development based in particular on protection of the environment and the rational management of natural resources,
- supporting the ACP States' efforts to increase their degree of self-sufficiency in food, in particular by strengthening the capacity of the ACP States to provide their populations with food of adequate quantity and quality and to ensure a satisfactory level of nutrition,
- reinforcing food security at national, regional and inter-regional level by stimulating regional trade flows of food products and improving coordination of the food policies of the countries concerned,
- guaranteeing the rural population incomes that will significantly improve their standard of living, in order to be able to cover their essential needs in the areas of food, education, health and living conditions,
- encouraging the active participation of the rural population, both men and women, in their own development by organizing small farmers into associations, and integrating producers, men and women, more effectively into national and international economic activity,
- increasing the participation of women in their capacity as producers, notably by improving access to all factors of production (land, inputs, credit, extension services and training),
- creating satisfactory living conditions and a satisfactory life-style in the rural environment, notably by developing social and cultural activities,
- improving rural productivity, notably by transfers of appropriate technology and the rational exploitation of plant and animal resources,
- reducing post-harvest losses,
- reducing the workload of women by, inter alia, promoting suitable post-harvest and food-processing technologies,
- diversifying job-creating rural activities and expanding activities that back up production,
- improving production by on-the-spot processing of the products of arable and livestock farming, fisheries and forestry,
- ensuring a better balance between food crops and export crops,
- developing and strengthening agricultural research tailored to the natural and human environment of the country and the region and meeting extension service and food security requirements,
- in the context of the above objectives, protecting the natural environment particularly through specific operations to protect and conserve ecosystems and to fight against drought, desertification and deforestation.

Article 43.

1. Operations to attain the objectives referred to in Article 42 shall be as varied and practical as possible, at national, regional and inter-regional level.
2. They shall, furthermore, be designed and deployed to implement the policies and strategies established by the ACP States and respect their priorities.
3. Support shall be provided for such policies and strategies in the context of agricultural cooperation in accordance with the provisions of this Convention.

Article 44.

1. Development of production calls for a rational stepping up of animal and crop production and involves:

- improving farming methods for rain-fed crops while conserving soil fertility,
- developing irrigated crops, inter alia through different types of agricultural water schemes (village water engineering, regulation of watercourses and soil improvement) ensuring optimum use and thrifty management of water which can be mastered by farmers and by local communities; operations shall also consist in the rehabilitation of existing schemes,
- improving and modernizing cultivation techniques and making better use of factors of production (improved varieties and breeds, agricultural equipment, fertilizers, plant treatment preparations),
- in the sphere of livestock farming, improving animal feed (more effective management of pasture, increased fodder production, more new water-points and repair of existing ones) and animal health, including the development of the infrastructure required for that purpose,
- better integration of arable and livestock farming;
- in the sphere of fisheries, modernizing fish-farming and developing aquaculture.

2. Other prerequisites for the development of production are:

- the extension of secondary and tertiary back-up activities for agriculture, such as the manufacture, modernization and promotion of agricultural and rural equipment and other inputs and, where necessary, their importation,
- the establishment or consolidation of agricultural savings and credit facilities adapted to local conditions in order to promote access to production factors for farmers,
- the encouragement of all those policies and incentives for producers which are appropriate to local conditions with a view to greater productivity and to improving farmer's incomes.

Article 45.

In order to ensure a return on output, agricultural cooperation shall contribute to:

- adequate means of preservation and suitable storage facilities for producers,
- effective control of disease, pests and other factors causing production losses,
- basic marketing arrangements underpinned by suitable organization of producers, with the necessary material and financial resources, and by adequate means of communication,

- facilities to prevent breaks in supplies (security storage) and guard against erratic price fluctuations (intervention storage),
- processing, packaging and marketing of products, particularly by developing artisanal and agro-industrial units, in order to adapt them to the trend of the market.

Article 46.

Rural promotion measures shall involve:

- the organization of producers within associations or communities in order to enable them to derive more benefit from joint contracts and investment and jointly owned equipment,
- encouragement of the participation of women and of recognition of the active role they play as full partners in the rural production and economic development processes,
- the development of social and cultural activities (such as health, education and culture) essential for improving rural life-styles;
- suitable extension services to train all farmers, both men and women,
- improvements in the training of instructors at all levels.

Article 47.

Cooperation in agronomic and agrotechnical research shall contribute:

- in particular, to improving varieties and breeds, the nutritional quality of products and their packaging, and developing technology and processes accessible to the producers,
- to better dissemination of the results of research undertaken in an ACP or non-ACP State and applicable in other ACP States,
- to extension work in order to inform the greatest possible number of users of the results of such research,
- to promoting increased coordination of research, particularly at regional and international levels, in accordance with Article 152, and to implement appropriate operations to achieve this objective.

Article 48.

Agricultural cooperation schemes shall be carried out in accordance with the detailed provisions and procedures laid down for development finance cooperation and in this context they may also cover the following:

1. under the heading of technical cooperation:

- exchange of information between the Community and the ACP States and among the ACP States themselves (on, for example, water use, intensive production techniques and the results of research),
- exchange of experience between professionals working in such areas as credit and savings, cooperatives, mutual insurance, artisanal activities and small-scale industry in rural areas;

2. under the heading of financial cooperation:

- supply of factors of production,
- support for market regulation bodies, on the basis of a coordinated approach to production and marketing problems,
- participation in the constitution of funds for agricultural credit facilities,
- opening of credit lines for farmers, farmers' trade organizations, artisans, women's groupings and small-scale industrial operators in rural areas, geared to their activities (such as supplies, primary marketing and storage), and also for associations implementing campaigns on specific themes,
- support for measures to combine industrial and trade skills in the ACP States and the Community within artisanal or industrial units, for the manufacture of inputs and equipment and for such purposes as the maintenance, packaging, storage, transport and processing of products.

Article 49.

1. Community measures aimed at food security in the ACP States shall be conducted in the context of the food strategies or policies of the ACP States concerned and of the development objectives which they lay down.

They shall be implemented, in coordination with the instruments of this Convention, in the framework of Community policies and the measures resulting therefrom with due regard for the Community's international commitments.

2. In this context, multiannual indicative programming may be carried out with the ACP States which so wish, so that their food supplies can be better forecast.

Article 30.

1. With regard to available agricultural products, the Community undertakes to ensure that export refunds can be fixed further in advance for all ACP States in respect of a range of products drawn up in the light of the food requirements expressed by those States.

Advance fixing shall be for one year and shall be applied each year throughout the life of this Convention, it being understood that the level of the refund will be determined in accordance with the methods normally followed by the Commission.

2. Specific agreements may be concluded with those ACP States which so request in the context of their food security policies.

Article 51.

Food aid operations shall be decided on the basis of the rules and criteria adopted by the Community for all recipients of this type of aid.

Subject to those rules and to the Community's freedom of decision in this matter, food aid operations shall be governed by the following guidelines:

(a) except in urgent cases, Community food aid, which shall be a transitional measure, must be integrated with the ACP States' development policies. This calls for consistency between food aid and other cooperation measures;

(b) where products supplied as food aid are sold, they must be sold at a price which will not disrupt the domestic market. The resulting counterpart funds shall be used to finance the execution or running of projects or programmes with a major rural development component; these funds may also be used for all legitimate purposes approved by common agreement, taking into account Article 226 (d);

(c) where the products supplied are distributed free of charge, they must form part of nutrition programmes aimed in particular at vulnerable sections of the population or be delivered as remuneration for work;

(d) food aid operations that form part of development projects or programmes or nutrition programmes may be planned on a multiannual basis;

(e) as a matter of priority, the products supplied must meet the needs of the recipients. In the selection of such products, account should be taken in particular of the ratio of cost to specific nutritive value and of the effect the choice might have on consumer habits;

(f) where, in a recipient ACP State, the trend of the food situation is such as to make it desirable for food aid to be replaced in whole or in part by operations designed to consolidate the current trend, alternative operations may be implemented in the form of financial and technical assistance, in accordance with the relevant Community rules. These operations shall be decided upon at the request of the ACP State concerned;

(g) with a view to providing products suited to the habits of consumers, speeding up the supply of products for emergency operations or helping to improve food security, food aid purchases may be made not only in the Community but also in the recipient country or in another ACP or other developing country, preferably in the same geographical region.

Article 52.

In implementing this Chapter, special attention shall be paid to assisting and enabling least-developed, land-locked and island ACP States to utilize fully the provisions of this Chapter. At the request of the States concerned, particular attention will be paid to:

- the specific difficulties of the least-developed ACP States in carrying out the policies or strategies they have established to strengthen their food self-sufficiency and food security. In this context, cooperation shall bear in particular on the productive sectors (including the supply of physical, technical and financial inputs), transport, marketing, packaging and the setting up of storage infrastructure,
- establishing a security stock system in landlocked ACP States in order to avoid the risk of breaks in supply,
- diversifying agricultural commodities production and improving food security in the island ACP States.

Article 53.

1. The Technical Centre for Agricultural and Rural Cooperation shall be at the disposal of the ACP States to provide them with better access to information, research, training and innovations in the spheres of agricultural and rural development and extension.

In carrying out its work within the framework of its responsibilities it shall operate in close cooperation with the institutions and bodies referred to in this Convention.

2. The tasks of the Centre shall be to:

(a) assure, where so requested by the ACP States, the dissemination of scientific and technical information on methods and means of encouraging agricultural production and rural development, and also scientific and technical support for drawing up regional programmes in its own spheres of activity;

(b) foster the development by ACP States, at national and regional level, of their own capacities for production, purchase and exchange of technical and scientific information on agriculture, rural development and fisheries;

(c) refer ACP States' requests for information to bodies qualified to deal with them, or deal direct with such requests;

(d) provide ACP national and regional documentation centres and research institutes with easier access to scientific and technical publications dealing with agricultural and rural development issues and to databanks in the Community and the ACP States;

(e) in general help the ACP States to gain easier access to the results of work carried out by the national, regional and international bodies, more especially those qualified in the technical aspects of agricultural and rural development, based in the Community and in the ACP States, and maintain contact with those bodies;

(f) foster the exchange of information between those engaged in agricultural and rural development, notably research workers, instructors, technicians and extension workers, on the results of agricultural and rural development operations;

(g) sponsor and help organize meetings of specialists, research workers, planners and development personnel so that they may exchange experiences of specific ecological environments;

(h) facilitate access by the ACP States' training and extension personnel to the information they need to carry out their tasks and refer requests for specific training to existing qualified bodies;

(i) help facilitate the adaptation of available technical and scientific information to the needs of the ACP States' departments responsible for development, extension services, and training including functional literacy programmes in rural areas;

(j) facilitate the dissemination of technical and scientific information for use in integration strategies of agricultural and rural development, by reference to the priority requirements of development.

3. In the performance of its tasks the Centre shall pay particular attention to the needs of the least-developed ACP States.

4. To carry out its work, the Centre shall be supported by decentralized regional or national information networks. Such networks shall be built up gradually and efficiently as needs are identified with, as far as possible, the support of the most appropriate organizations and institutions.

5. The Committee of Ambassadors shall be the supervisory authority of the Centre. It shall lay down the rules of operation and the procedures for the adoption of the Centre's budget. The budget shall be financed in accordance with the rules laid down in this Convention in respect of development finance cooperation.

6. (a) The Centre shall be headed by a Director appointed by the Committee of Ambassadors.

(b) The Director of the Centre shall be assisted by staff recruited within the limit of the numbers budgeted for by the Committee of Ambassadors.

(c) The Director of the Centre shall report on its activities to the Committee of Ambassadors.

7. (a) To provide the Director of the Centre with technical and scientific assistance in working out appropriate solutions to the problems encountered by the ACP States, notably to improve their access to information, technical innovation, research and development in the sphere of agricultural and rural development and to devise the Centre's action programmes, an advisory committee shall be set up, composed on a basis of parity of agricultural and rural development experts.

(b) The members of the Advisory Committee shall be appointed by the Committee of Ambassadors in accordance with the procedures and criteria determined by it.

Chapter 2. Drought and Desertification Control

Article 54.

The ACP States and the Community recognize that certain ACP States are facing considerable difficulties as a result of endemic drought and growing desertification, which hold back all efforts at development, in particular those aimed at achieving the priority objective of food self-sufficiency and food security.

The two Parties agree that in a number of ACP States control of drought and desertification constitutes a major challenge on which depends the success of their development policy.

Article 55.

The correction of this situation and the sustainable development of the countries affected or threatened by such disasters require a policy encouraging the restoration of the natural environment and of the balance between resources and the human and animal population; in particular through such means as improved harnessing and management of water resources, appropriate agriculture, agroforestry and reforestation schemes and control of the causes of desertification as well as of practices that engender it.

Article 56.

If a return to the natural balance is to be expedited, a drought and desertification control component in particular must be incorporated into all agricultural and rural development operations, such as:

1. - the extension of agroforestry systems combining farming and forestry, research and development activities to produce plant species that are more adapted to local conditions,
- the introduction of suitable techniques aimed at increasing and maintaining the productivity of agricultural land, arable land and natural pastureland with a view to controlling the various forms of erosion,
- the reclamation of land that has deteriorated, by means of reforestation or agricultural-land improvement, combined with maintenance schemes involving, as far as possible, the people and authorities concerned in order to safeguard the progress made;
2. the encouragement of measures to economize on wood as an energy source by stepping up research into, application of and information on new and renewable sources of energy such as wind, solar and biomass energy, and by the use of improved stoves with a greater heat yield;
3. the rational development and management of forestry resources by setting up at national or regional level, forestry management plans aimed at optimizing the exploitation of forestry resources;
4. the pursuit of ongoing campaigns to educate the people concerned to be aware of the phenomena of drought and desertification and to train them in the possible ways of controlling them.
5. an overall coordinated approach which, as a result of schemes such as those referred to in points 1 to 4, seeks to ensure the restoration of a suitable ecological balance between natural resources and the human and animal population, without prejudicing the objective of harmonious economic and social development.

Article 57.

The operations to be undertaken, where necessary with research backing, shall cover, inter alia:

1. improving man's knowledge of, and ability to forecast, desertification phenomena by observing developments in the field, by means, inter alia, of modern technologies such as remote sensing, by making use of results achieved and gaining a better understanding of the changes to the human environment in time and space;
2. making an inventory of water-tables and of their replenishment capacity with a view to better predictability of water supplies, using surface and ground water and improving management of these resources, in particular by means of dams or other appropriate developments for the purpose of satisfying the needs of people and animals, and improving weather forecasting;
3. establishing a system for the prevention and control of bush fires and deforestation.

Title III. DEVELOPMENT OF FISHERIES

Article 58.

The ACP States and the Community recognize the urgent need to promote the development of fishery resources of ACP States both as a contribution towards the development of fisheries as a whole and as a sphere of mutual interest for their respective economic sectors.

Cooperation in this field shall promote the optimum utilization of the fishery resources of ACP States, while recognizing the rights of landlocked States to participate in the exploitation of sea fisheries and the right of coastal States to exercise jurisdiction over the living marine resources of their exclusive economic zones in conformity with current international law and notably the conclusions of the Third United Nations Conference on the Law of the Sea.

Article 59.

To encourage the development of the exploitation of the fishery resources of the ACP States, all the mechanisms for assistance and cooperation provided for in this Convention, notably financial and technical assistance in accordance with the terms set out in Title III, Part Three shall be applied to fisheries.

The priority objectives of such cooperation shall be to:

- improve knowledge of the fisheries environment and its resources,
- increase the means of protecting fishery resources and monitoring their rational exploitation,
- increase the involvement of the ACP States in the exploitation of deep-sea fishery resources within their exclusive economic zones,
- encourage the rational exploitation of the fishery resources of the ACP States and the resources of high seas in which the ACP States and the Community share interests,
- increase the contribution of fisheries including aquaculture, non-industrial fishing and inland fisheries, to rural development, by giving importance to the role they play in strengthening food security, improving nutrition and the social and economic conditions of the communities concerned; this implies, inter alia, a recognition of and support for women's work at the post-harvest stage and in the marketing of fish,
- increase the contribution of fisheries to industrial development by increasing catches, output, processing and exports.

Article 60.

Assistance from the Community for fisheries development shall include support in the following areas:

- (a) fisheries production, including the acquisition of boats, equipment and gear, the development of infrastructure for rural fishing communities and the fishing industry and support for aquaculture projects, notably by providing specific lines of credit to appropriate ACP institutions for onlending to the operators concerned;
- (b) fisheries management and protection, including the assessment of fish stocks and of aquacultural potential, the improvement of environmental monitoring and control and the development of ACP coastal States' capacities for a rational management of the fishery resources in their exclusive economic zones;
- (c) processing and marketing of fishery products, including the development of processing, collection, distribution and marketing facilities and operations; the reduction of post-harvest losses and the promotion of programmes to improve fish utilization and nutrition from fishery products.

Article 61.

Particular attention shall be paid in fishery resource development cooperation to the training of ACP nationals in all areas of fisheries, to the development and strengthening of ACP research capabilities and to the promotion of intra-ACP and regional cooperation in fisheries management and development.

Article 62.

In implementing Articles 60 and 61, special attention shall be given to enabling least-developed, landlocked and island ACP States to maximize their capabilities to manage their fishery resources.

Article 63.

The ACP States and the Community recognize the need for direct or regional cooperation or, as appropriate, cooperation through international organizations, with a view to promoting conservation and the optimum use of the living resources of the sea.

Article 64.

The Community and the ACP States recognize that coastal States exercise sovereign rights for the purpose of exploring, exploiting, conserving and managing the fishery resources of their respective exclusive economic zones in conformity with current international law. The ACP States recognize that there is a role for Community Member States' fishing fleets, operating lawfully in waters under ACP jurisdiction, in the development of ACP fishery potential and in economic development in general in the coastal ACP States. Accordingly, the ACP States declare their willingness to negotiate with the Community fishery agreements aimed at guaranteeing mutually satisfactory conditions for fishing activities of vessels flying the flag of one of the Member States of the Community.

In the conclusion or implementation of such agreements, the ACP States shall not discriminate against the Community or among the Member States, without prejudice to special arrangements between developing States within the same geographical area, including reciprocal fishing arrangements, nor shall the Community discriminate against ACP States.

Article 65.

Where ACP States situated in the same subregion as territories to which the Treaty establishing the European Economic Community applies wish to engage in fishing activities in the corresponding fishing zone, the Community, and the ACP States shall open negotiations with a view to concluding a fishery agreement in the spirit of Article 64, taking account of their specific situation in the region and of the objective of strengthening regional cooperation between those territories and the neighbouring ACP States.

Article 66.

The Community and the ACP States recognize the value of a regional approach to fisheries access and shall support moves by ACP coastal States towards harmonized arrangements for access for fishing vessels.

Article 67.

The Community and the ACP States agree to take all appropriate steps to ensure that the efforts undertaken in fisheries cooperation under this Convention shall be effective, taking into account notably the Joint Declaration on the origin of fishery products.

As regards exports of fishery products to the markets of the Community, due account shall be taken of Article 358.

Article 68.

The mutually satisfactory conditions referred to in Article 64 shall bear in particular on the nature and the scale of the compensation to be received by the ACP States concerned under bilateral agreements.

Compensation shall be additional to any allocation relating to projects in the fisheries sector pursuant to Title III, Part Three of this Convention.

Compensation shall be provided for partly by the Community as such and partly by the shipowners and shall take the form of financial compensation which may include licensing fees and, where appropriate, any other elements agreed upon by the parties to the fishery agreement, such as obligatory landing of part of the catch, employment of ACP nationals, the taking on board of observers, transfer of technology, research and training grants.

Compensation shall relate to the scale and value of the fishing opportunities provided in the exclusive economic zones of the ACP States concerned.

In addition, with regard to the fishing of highly migratory species, the particular character of such fisheries shall be taken into account in the respective obligations under the agreements, including the financial compensation.

The Community shall take all necessary measures to ensure that its vessels comply with the provisions of the agreements negotiated and with the laws and regulations of the ACP State concerned.

Title IV. COOPERATION ON COMMODITIES

Article 69.

ACP-EEC cooperation in the field of commodities shall take into account:

- the fact that the economies of a large number of ACP States are highly dependent on their exports of primary products,
- the deteriorating situation of their exports in most cases, mainly as a result of the downward trend in world prices,
- the structural nature of the difficulties in many commodity sectors both within the economies of the ACP States and at international level, in particular within the Community.

Article 70.

The Community and the ACP States recognize the need for joint efforts aimed at resolving the structural difficulties in many commodity sectors and they take as the main objectives of their cooperation in this field:

- diversification, both horizontal and vertical, of the ACP economies, in particular through the development of processing, marketing, distribution and transport (PMDT), and
- improvement of the competitiveness of the ACP States' commodities on world markets through the reorganization and rationalization of their production, marketing and distribution activities.

Article 196.

1. The system shall apply to the earnings from an ACP State's exports of the products referred to in Article 187 (2) if, during the year preceding the year of application, earnings from the export of each product to all destinations, re-exports excluded, represented at least 5 % of its total earnings from exports of all goods. The percentage shall be 4 % in the case of sisal.

2. For the least-developed, landlocked and island ACP States, the percentage referred to in paragraph 1 shall be 1%.

3. Where, following a natural disaster, a substantial fall in production of the product in question is recorded during the year preceding the year of application, the percentage referred to in paragraph 1 shall be calculated on the basis of the average export earnings from that product during the three years preceding the year of the disaster.

A substantial fall in production shall be taken to mean at least 50 % of the average production during the three years preceding the year of the disaster.

Article 197.

1. In order to implement the system, a reference level and a transfer basis shall be calculated for each ACP State and for exports of each product referred to in Article 187 (1) to the Community or other destinations as defined in Article 189.

2. The reference level shall be constituted by the average of export earnings during the period of the six calendar years preceding each year of application less the two years with the highest and lowest figures.

3. The transfer basis shall be constituted by the difference between the reference level and actual earnings in the calendar year of application, reduced by an amount corresponding to 4,5 % of the reference level. In the case of the least-developed ACP States, this percentage shall be 1%.

4. The reductions referred to in paragraph 3 shall not apply in the case of the least-developed or landlocked ACP States if the difference between the reference level and actual earnings is less than ECU 2 million, or in the case of island ACP States if this difference is less than ECU 1 million.

In no case shall the reduction of the difference between the reference level and actual earnings be greater than:

- 20% for the least-developed and for landlocked ACP States,

- 30% for other ACP States.

5. The amount of the transfer shall be the transfer basis after application, where relevant, of Articles 202 to 204 and 194,

Article 198.

1. Where an ACP State:

- begins processing a product traditionally exported in the raw state, or

- begins exporting a product which it did not traditionally produce,

the system may be put into operation on the basis of a reference level calculated over the three years preceding the year of application.

2. In the case of the ACP States accorded the derogation:

- referred to in Article 189 (2), the transfer basis shall be calculated by adding to the earnings from exports of the product or products concerned to the Community the earnings from exports of those products to other ACP States;

- referred to in Article 189 (3), the transfer basis shall be calculated according to the earnings from exports of the product or products concerned to all destinations.

Article 199.

1. In order to ensure that the system functions efficiently and rapidly, statistical cooperation shall be instituted between each ACP State and the Commission.

2. The ACP States shall notify the Commission of the annual statistical data specified in the joint declaration in Annex XLII.
3. This information must be sent to the Commission not later than 31 March in the year following that of application. Failure to do so shall result in the ACP State concerned losing all transfer rights in relation to the product or products in question for the relevant year of application.

Article 200.

The system shall be implemented in respect of the products listed in Article 187 where they are:

- (a) released for home use in the Community, or
- (b) brought into the Community under the inward processing arrangements in order to be processed.

2. The statistics to be used to carry out the calculations referred to in Article 197 shall be those calculated and published by the Statistical Office of the European Communities. :

3. In the case of ACP States accorded the derogation

(a) referred to in Article 189 (2), the statistics relating to exports of the product or products in question to other ACP States shall be the volume exported by the ACP State concerned multiplied by the average unit value of imports by the Community as calculated and published by the Statistical Office of the European Communities or, failing those, the statistics of the ACP State concerned;

(b) referred to in Article 189 (3), the statistics relating to exports of the product or products in question to all destinations shall be the volume exported by the ACP State concerned multiplied by the average unit value of imports by the Community as calculated and published by the Statistical Office of the European Communities or, failing those, the statistics of the ACP State concerned.

4. Should there be significant differences between the statistics of the Statistical Office of the European Communities and those of the ACP State concerned, consultation shall be held between that ACP State and the Commission.

Article 201.

No transfer shall take place if it emerges from the examination of the dossier to be undertaken by the Commission in conjunction with the ACP State concerned that the fall in earnings from exports to the Community is the result of measures or policies involving discrimination detrimental to the Community.

Article 202.

The transfer basis shall be reduced in due proportion to the fall in earnings from exports to the Community of the product in question if, after joint examination by the Commission and the ACP State concerned, it appears that such a drop is the consequence of trade-policy measures taken by the ACP State or through its economic operators with the aim of restricting supply; such reduction may entail the annulment of the transfer basis.

Article 203.

Should examination of the trend of the ACP State's exports, to all destinations, of production of the product in question in the ACP State concerned and of demand in the Community reveal significant changes, consultations shall take place between the Commission and that ACP State to determine whether the transfer basis is to be maintained or reduced, and, if so, to what extent.

Article 204.

In no case shall any transfer basis for a given product be greater than the corresponding amount calculated on the basis of the exports of the ACP State concerned to all destinations.

Article 205.

1. The Commission shall adopt a transfer decision on completion of the examination carried out in conjunction with the ACP State; this examination shall bear on the statistical data and the calculation of the transfer basis which may give rise to a

payment.

2. For each transfer a transfer agreement shall be concluded between the Commission and the ACP State concerned.

Article 206.

1. The ACP State concerned and the Commission shall take such steps as are required to ensure that advances and transfers are made rapidly in accordance with the procedures laid down in Article 207.

2. Article 205 shall be applicable by analogy to advances.

Article 207.

2. The ACP State concerned and the Commission shall take all possible steps to ensure that the procedures referred to in Articles 201 to 203 are concluded not later than 30 June of the year in question. After this period has elapsed, the Commission shall notify the ACP States of the amount of the transfer resulting from appraisal of the dossier.

3. Without prejudice to Article 206 and not later than 31 July of the year in question the Commission shall take decisions concerning all transfers, except for those where consultations have not been concluded.

4. On 30 September of the year in question the Commission shall report to the Committee of Ambassadors on the progress made with the processing of all transfers.

Article 208.

1. In the event of a disagreement between an ACP State and the Commission over the results of the examinations or consultations referred to in Articles 201 to 203 and 199 (3), the ACP State concerned shall have the right to initiate, without prejudice to possible recourse to Article 352, a good offices procedure.

2. The good offices procedure shall be carried out by an expert appointed by agreement between the Commission and the ACP State concerned.

3. Within two months of this appointment, the conclusions of the procedure shall be communicated to the ACP State concerned and to the Commission, which shall take account of them in making the transfer decision.

The ACP State concerned and the Commission shall take all possible steps to ensure that the decision is taken not later than 31 October following receipt of the request,

4. The procedure shall not result in a delay in the processing of any other transfers for the same year of application.

Article 209.

1. Where application of Articles 196 and 197 gives rise to a transfer basis, the ACP State concerned shall, in the month following receipt of the notification referred to in Article 207 (1), send the Commission a substantial analysis of the sector recording the loss of earnings, the causes of the loss, the policies pursued by the authorities and the projects, programmes and operations to which the recipient State undertakes to allocate the resources in accordance with the objectives set out in Article 186 (2).

2. Should the recipient ACP State intend, as provided for in Article 186 (2), to allocate the funds to a sector other than that where the loss has occurred, it shall communicate to the Commission the reasons for this allocation.

3. Projects, programmes or operations to which the recipient ACP State undertakes to allocate the transferred resources shall be examined jointly by the Commission and the ACP State concerned.

4. Where, in the sector for which the transfer is destined, there is already an adjustment operation designed to restructure production and export activities or to achieve diversification, the resources shall be used to second these efforts and; where necessary, support any consistent reform policy in the sectors concerned.

Article 210.

When agreement is reached on the use of resources, the ACP State and the Commission shall sign a protocol setting up a framework of mutual obligations stipulating how the funds are to be used at the various stages of the operations agreed on.

Article 211.

1. The transfer shall be made in ecus upon signature of the transfer agreement referred to in Article 205 (2) into an interest-bearing account, for which presentation of two signatures, of the ACP State and the Commission, shall be required. Any interest shall be credited to this account.

Article 212.

1. Within twelve months of the mobilization of resources the recipient ACP State shall send the Commission a report on the use which it has made of the funds transferred.
2. Should the report referred to in paragraph 1 not be presented within the time limit set or should it call for comment, the Commission shall send a request for substantiation to the ACP State concerned, which shall be obliged to reply thereto within two months.
3. Once the deadline referred to in paragraph 2 has expired, the Commission may, having referred the matter to the Council of Ministers and having duly informed the ACP State concerned, three months after completion of this procedure, suspend application of decisions on subsequent transfers until that State has provided the required information.

The ACP State concerned shall be notified of this measure immediately.

Chapter 2. Special Undertakings on Sugar

Article 213.

1. In accordance with Article 25 of the ACP-EEC Convention of Lomé signed on 28 February 1975 and with Protocol 3 annexed thereto, the Community has undertaken for an indefinite period, notwithstanding the other provisions of this Convention, to purchase and import, at guaranteed prices, specific quantities of cane sugar, raw or white, which originates in the ACP States producing and exporting cane sugar and which those States have undertaken to deliver to it
2. The conditions for the implementation of the aforementioned Article 25 have been laid down by Protocol 3 referred to in paragraph 1. The text of the Protocol is annexed to this Convention as Protocol 8.
3. Article 177 of this Convention shall not apply within the framework of the said Protocol.
4. For the purpose of Article 8 of the said Protocol the institutions established under this Convention may be used during the period of application of this Convention.
5. Article 8 (2) of the said Protocol shall apply should this Convention cease to be operative.
6. The declarations contained in Annexes XII, XXI and XXII to the Final Act to the ACP-EEC Convention of Lomé signed on 28 February 1975 are reaffirmed and their provisions shall continue to apply. These declarations are annexed as such to this Convention.
7. This Article and the Protocol 3 referred to in paragraph 1 shall not apply to relations between the ACP States and the French overseas departments.

Chapter 3. Mining Products: Special Financing Facility (Sysmin)

Article 214.

1. A special financing facility shall be set up for those ACP States whose mining sectors occupy an important place in their economies and are facing difficulties that are already perceived or foreseeable in the near future.

2. Its aims are to contribute towards establishing a more solid and wider basis for the development of the ACP States while supporting their efforts:

- to safeguard their mining production and export sectors by remedial or preventive action designed to alleviate the serious consequences for their economies of the loss of viability as a result of a decline in their production or export capacity and/or export earnings in the mining products sector following major technological or economic changes or temporary or unforeseeable disruptions beyond the control of the State concerned and of the enterprise managing the sector concerned. Particular attention shall be paid to adjusting the competitive situation of enterprises to changes in market conditions, or

- for States heavily dependent on exports of one mining product, to diversify and broaden the bases of their economic growth, notably by helping them complete development projects and programmes under way where these are seriously jeopardized owing to substantial falls in export earnings from that product.

3. In pursuing these objectives, this support:

- will be adapted to the economic restructuring needs of the ACP State concerned,

- will take into account at the time of its formulation and implementation the mutual interests of the Contracting Parties.

Article 215.

1. The special financing facility provided for in Article 214 shall be aimed at ACP States which export to the Community and which, during at least two of the four years preceding that of the request for aid, have derived either:

(a) 15% or more of their export earnings from one of the following products: copper (including cobalt), phosphates, manganese, bauxite and alumina, tin, iron ore, whether or not in agglomerate form, uranium; or

(b) 20% or more of their export earnings from all mining products (excluding precious minerals other than gold, oil and gas).

However, for least-developed, landlocked or island ACP States, the figure stipulated in (a) shall be 10 % and the figure stipulated in (b) shall be 12 %.

For the calculation of the thresholds referred to in (a) and (b) earnings shall not include those from mining products not covered by the system.

2. Recourse to the special financing facility shall be possible where, in the light of the aims referred to above:

(a) it is perceived or expected that the viability of one or more enterprises in the mining sector has been or is about to be seriously affected following temporary or unforeseeable difficulties - whether technical, economic or political - beyond the control of the State or undertaking concerned, and where such damage to viability leads to or may lead to a significant fall in revenue for the ACP State concerned - assessed in particular on the basis of a drop in production or export capacities of the product in question of around 10% - and/or a deterioration in its external trade balance.

Foreseeable damage to viability shall be characterized by the onset of deterioration of the means of production and its impact on the country's economy; or

(b) in cases under paragraph 1 (1), it is perceived that a substantial fall in export earnings from the mining product concerned, in relation to the average for the two years before the request, is seriously jeopardizing the completion of development projects and programmes under way. To be taken into consideration, such a fall in earnings must:

- be caused by technical, economic or political difficulties and not artificially provoked, directly or indirectly, by policies and measures of the ACP State or the economic operators concerned,

- result in a corresponding fall in total export earnings of approximately 10% at least in the year before that of the request.

The said difficulties shall refer to disruptions such as accidents, serious technical incidents, serious internal or external political events, major technological and economic changes or major changes in trade relations with the Community.

3. An ACP State may request financial aid under the special financing facility where the conditions set out in paragraphs 1 and 2 are met.

Article 216.

1. The aid referred to in Article 215 shall be used in pursuit of the aims of the facility as set out in Article 214 (2).

- Where maintenance or return to viability of the mining enterprise or enterprises affected is deemed possible and appropriate by the two parties, the aid shall be used to finance projects or programmes, including the financial restructuring of the enterprise or enterprises concerned, with a view to maintaining, re-establishing or rationalizing at a viable level the production and export capacity concerned.

- Where it is not thought possible by the two parties to maintain or restore viability, the aid shall be used to broaden the bases of economic growth through the financing of viable horizontal or vertical conversion or diversification projects or programmes.

- By common agreement, the aim of diversification may also be pursued where the economy is dependent on the mining product in question to a significant degree, even where: viability can be re-established.

- Where Article 215 (2) (b) is applicable, the objective of diversification shall be pursued through financial assistance to aid the completion of development projects and programmes under way outside the mining sector which are in jeopardy.

2. Any decision to allocate funds to projects or programmes shall take due account of economic interests and the social implications of such aid in the ACP State concerned and in the Community and will be adapted to the economic restructuring needs of that ACP State.

In the case of requests presented under Article 215 (1) (b), the Community and the ACP State concerned shall jointly and systematically seek to establish the scope and the terms of any aid accorded in such a way that such aid does not injure competing Community mining production.

The consideration and appraisal of these factors shall be part of the analysis referred to in Article 217 (2).

3. Special attention shall be accorded to:

- processing and transport operations, notably at regional level, and the proper integration of the mining sector in the country's overall economic and social development,

- preventive operations to minimize any disruptive effects by adapting technology, improving the technical and managerial skills of local staff and adapting the skills of local staff to enterprise management techniques,

- stepping up the ACP States' scientific and technical capacity for the production of new materials.

Article 217.

1. The request for aid must include information on the nature of the problems encountered, the perceived or expected consequences of the disruption both at national level and at the level of the mining enterprise or enterprises affected and indications in the form of an identification sheet on the measures or actions undertaken or desired to remedy them.

The request shall be made as soon as these consequences are identified and within a period not exceeding 12 months for making up the file.

2. Prior to any Community decision a technical, economic and financial analysis shall be made systematically of the mining sector concerned in order to assess both the eligibility of the request and the project or programme to be undertaken to utilize the aid. That analysis, which shall be very detailed, shall, in order to identify the operation, take particular account of world market prospects and, without prejudice to the first paragraph of Article 216 (2), the situation of the Community market in the products concerned. It shall also include an analysis of the possible implications of such an operation for the competing mining products of Member States and the possible implications of its non-implementation for the ACP State concerned. Its objective shall be to ascertain:

- whether the viability of the means of production concerned has been or is likely to be damaged and whether that viability can be restored, or whether recourse to diversification measures is more appropriate, or

- whether the fall in export earnings referred to in Article 215 (2) (b) seriously jeopardizes the implementation of development projects and programmes under way.

The analysis shall be carried out in accordance with the procedures for financial and technical cooperation. It shall require the close cooperation of the ACP State and economic operators concerned.

3. A single decision shall be taken on eligibility and the financing proposal.

The Community and the ACP State concerned shall take the necessary steps to expedite appraisal of requests so that the

appropriate action may be taken swiftly.

Article 218.

1. If necessary, technical assistance for setting up and supervising the project may be financed under the facility.
2. The procedures applicable to such assistance and the detailed rules for its implementation shall be those laid down in this Convention for development finance cooperation.

Article 219.

1. For the purposes specified in Article 214 and for the period of application of the Financial Protocol annexed to this Convention, the Community shall allocate the overall amount provided for in that Protocol to cover all its commitments under this special financing facility. The amount allocated to the facility shall be managed by the Commission.
2. (a) This overall amount shall be divided into a number of equal annual instalments corresponding to the number of years of application. Each year, except the last, the Council of Ministers, on the basis of a report submitted to it by the Commission, may authorize the advance use of up to 50% of the following year's instalment where required.

(b) Any balances remaining at the end of each year of application of the Financial Protocol annexed to this Convention, except the last, shall be carried over automatically to the following year.

(c) Consequently, the resources available for each year of application will be made up of the following elements:
 - the annual instalment, less any amounts used under (a);
 - the sums carried over under (b);
(d) If the resources available for any year of application are insufficient, the amounts provided for shall be reduced accordingly, without prejudice to subparagraphs (a), (b) and (c).

Before expiry of the period of application of the Financial Protocol, the Council of Ministers shall decide on the allocation of any balances remaining from the overall amount.

3. The amount of the aid provided for in Article 215 shall be determined by the Commission in the light of the funds available under the special financing facility, the nature of the relevant projects and programmes, the possibilities for cofinancing and the relative importance of the mining. industry concerned for the economy of the ACP State.
4. Under no circumstances may a single ACP State be eligible for more than 35 % of the resources available as a result of the application of paragraph 2 (c). The rate shall be 15 % for aid under Article 215 (1) (b).
5. Aid accorded to an ACP State under the special financing facility may be on-lent by that State to the final borrower on different financial terms which shall be established in the financing decision and shall result from an analysis of the aid project conducted on the basis of the usual economic and financial criteria for the type of project planned.
6. The analysis referred to in Article 217 shall be financed from resources of the facility.
7. In exceptional circumstances arising out of an emergency, confirmation and proof of which will have to be provided initially by the analysis, an ACP State which so requests may be granted an advance by way of partial prefinancing of the project or programme which it precedes.

Section 3. Debt and Structural Adjustment Support

Article 239. Debt

1. The ACP States and the Community share the view that the external debt situation of ACP States has emerged as a major development issue, and that the associated heavy debt-servicing obligations contribute to constraints on import capacity and the level of investments in these States, thus affecting their growth and development.

2. The ACP States and the Community reaffirm their determination to develop and implement in a coordinated and integrated way the different instruments of the Convention and to implement the following measures with a view to contributing to the attenuation of the debt burden of the ACP States and their balance of payment problems with a view to stimulating economic recovery and growth.

Article 240.

In order to avoid increases in the debt of ACP States, finance under this Convention, apart from bank loans and risk capital, is provided in the form of grants. Specifically the following measures and actions will be taken:

(a) for projects with high rates of return, and in particular for Sysmin financing, a two-stage procedure will be followed whereby ACP States will: receive grants and will on-lend the funds at appropriate market terms and conditions, with suitable arrangements for deposit of interest and repayment, less an agreed service charge, in a counterpart fund account, managed according to normal procedures as agreed for this type of finance generated from Community assistance;

(b) Stabex transfers will be granted without any obligation for the beneficiary ACP States to reconstitute the resources of the system.

2. In addition, the Community agrees to:

(a) enable, on a case-by-case basis, the acceleration of the use of the resources of past indicative programmes which have not been committed through the quick-disbursing instruments provided for in this Convention in order to contribute to the attenuation of the debt burden;

(b) grant, at the request of an ACP State:

The Community commits itself to support the ACP States' efforts to:

- (h) adopt measures aimed at increasing intra-ACP trade through the use of existing subregional and regional payments mechanisms and encourage clearing arrangements and credit insurance in all intra-ACP trade transactions.

Article 242.

In order to contribute to the servicing of the debt resulting from Community loans from the Bank's own resources, special loans and risk capital, the ACP States may, in accordance with arrangements to be made on a case-by-case basis with the Commission, use the available foreign currency referred to in Article 319 for such servicing, as and when debt repayment falls due and up to the amount required for payments in national currency.

Article 243. Structural Adjustment Support

The ACP States and the Community recognize that the economic and social problems being experienced by ACP States are the result of both internal factors and external developments. They see the need for urgent action and share the view that short and medium-term policies must reinforce the long-term development efforts and goals of ACP States. To this end, they have agreed that the Convention should provide structural adjustment support to assist ACP States in their effort to:

- (a) create an economic environment favourable to a resumption of, or to an acceleration in, the growth of GDP and employment;
- (b) improve the social and economic well-being of the population as a whole;
- (c) improve public sector management and provide appropriate private sector incentives;

- (f) improve balance-of-payments performance and the foreign-exchange position;
- (g) ensure that adjustment is economically viable and socially and politically bearable.

Article 244.

Adjustment support shall be administered on the basis of the following principles:

- (a) the ACP States shall bear primary responsibility for the analysis of the problems to be solved and the preparation of reform programmes;
- (b) support programmes shall be adapted to the different situation in each ACP State and be sensitive to the social

conditions, culture and environment of these States;

(i) support shall be given in the context of a joint assessment between the Community and the ACP State concerned on the reform measures being undertaken or contemplated either at a macro-economic or sectoral level.

Article 245.

(a) as provided for in Article 1 of the Financial Protocol; and

Article 246.

1. All ACP States shall in principle be eligible for structural adjustment assistance depending on the scope of the reforms being undertaken or contemplated at the macroeconomic or sectoral level, their effectiveness, and their likely impact on the economic, social and political dimension of development, and on economic and social hardships being experienced, as reflected, by indicators such as:

Article 247.

1. The resources earmarked for structural adjustment support may be mobilized either at the beginning of or during the Financial Protocol period, at the request of the ACP State concerned.

4. Structural adjustment support shall be implemented flexibly and the instruments chosen on a case-by-case basis.

A GIP designed in keeping with the approach to structural adjustment support laid down in the Convention will usually be the most appropriate instrument for countries carrying out macroeconomic reforms. In the case of sectoral adjustment, the assistance will be given in the form of an SIP in kind or in foreign currency.

An SIP could also be used in a situation of macro-economic reforms with a view to achieving a greater sectoral impact.

Article 248.

The implementation of each support programme shall:

- (a) be adapted to the needs of each recipient State;
- (b) ensure consistency between the use of the different support instruments and the approach of structural adjustment as defined in Articles 243 and 244;
- (c) ensure that the eligibility of ACP economic operators for access to the resources of the programme is as wide and transparent as possible and that the best price/quality ratio is obtained on imported goods. 2. The preparation, appraisal and financing decision for structural adjustment programmes shall be carried out according to

the provisions on implementation procedures of Chapter 5 with due regard to the need to ensure the quick disbursing feature of structural adjustment programmes. On a case-by-case basis, retro-active financing of a limited part of imports of ACP-EEC origin may be permissible.

3. In the case of foreign exchange programmes, funds will be transferred to an ecu-denominated bank account opened by the ACP States concerned in a Community Member State from which all disbursement covered by the programme shall be made. Such funds will be considered as an advance to be cleared by the submission of justification of the use of funds.

Section 4. Cofinancing

(e) projects for which a diversification of financing may lead to an advantageous solution from the point of view of the financing and investment costs and of other aspects of the implementation of the said projects;

(f) projects of a regional or inter-regional nature.

3. Cofinancing may be in the form of joint or parallel financing. Preference will be given in each case to the solution which is more suitable from the point of view of cost-effectiveness.

4. With the agreement of the parties concerned:

(a) measures shall be taken to coordinate and harmonize operations of the Community and those of other cofinancing bodies, in order to minimize the number of procedures to be undertaken by the ACP States and to render those procedures more flexible, notably as regards:

2. Similar assistance, as set out in paragraph 1, may be envisaged to help with the voluntary integration or reintegration of persons who have had to leave their homes as a result of conflicts or natural disasters. In implementing this provision account shall be taken of all the factors leading to the displacement in question including the wishes of the population concerned and the responsibilities of the government in meeting the needs of its own people.
